

## Gradient concept

In addition to color selection, you can also drag across the color bar to apply a gradient to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Color** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current color.

3 Rotate the circle along the path to apply a blue gradient to the object, which can then be moved along the gradient path.

An alternative to an address bar is working with gradients directly on the object. There is a **Gradients** editor available from the **Color** window on the toolbar. This **Gradients** editor gives you high precision drag positioning as well as a few additional options.

You can work with **Elliptical** and **Radial** gradients in Adobe Photoshop. To create a radial gradient, use the **Radial Gradient Tool** (G) in the **Tools Panel**. Gradients of each type are created by dragging the **Color** & **Transparency** sliders.
