

Biomedical engineering has been considered to be totally separate from biochemical engineering, although the boundary between the two is increasingly vague, particularly in the areas of cell surface receptors and animal cell culture.

Biochemical engineering has usually meant the extension of chemical engineering principles to systems using a biological catalyst to bring about desired chemical transformations.

Bio Engineering

In fact the definitions of biochemical, bioprocess engineering and synthetic biology is close to each other and have some difference in their working domain and can be called subsets of bioengineering
