Dulhare,Mohammad Sufian Badar,Jameel Ahamed,M. A. Rizvi,2025-08-02 The book covers Blockchain Technology and its emerging field by developing socio economic systems viz efficiently establishing transparency trust increasing utilization of various resources and reducing costs This book is organized into 2 volumes that provide an overview of Blockchain technology foundations of Blockchain Machine Learning and Distributed Systems Cryptography Consensus algorithm Bitcoin concepts and its properties Smart Contracts developing knowledge of tools like Hyperledger Multichain Ethereum etc Machine learning algorithms applications of a smart city using machine learning and blockchain technology While this book dwells on the foundations of Blockchain Technology as a part of transparency scalability integrity security and how the machine learning algorithms integrate with blockchain technology based smart city applications it will also focus on contemporary topics for Research and Development in various sectors With an in depth knowledge of the technology underlying various platforms such as Bitcoin Ethereum and Hyperledger As a beginner the reader will be learning the importance of consensus in transactions how transactions are stored on Blockchain how to use it in the financial domain such as virtual currency cross border payment and settlement bills and supply chain finance securities insurance and transactions viz Bitcoin The reader will be able to develop custom smart contracts using Solidity and Remix IDE using the Ethereum platform and deploy them on the test Blockchain network using Truffle The reader will learn how to build a machine learning model and analyze the data which is generated by the practical use cases of Blockchain in various smart cities sectors like Smart Health Smart food agriculture smart transport smart water management smart waste management smart energy management etc **Blockchain, Big Data and Machine Learning** Neeraj Kumar,N. Gayathri,Md Arafatur Rahman,B. Balamurugan,2020-09-24 Present book covers new paradigms in Blockchain Big Data and Machine Learning concepts including applications and case studies It explains dead fusion in realizing the privacy and security of blockchain based data analytic environment Recent research of security based on big data blockchain and machine learning has been explained through actual work by practitioners and researchers including their technical evaluation and comparison with existing technologies The theoretical background and experimental case studies related to real time environment are covered as well Aimed at Senior undergraduate students researchers and professionals in computer science and engineering and electrical engineering this book Converges Blockchain Big Data and Machine learning in one volume Connects Blockchain technologies with the data centric applications such Big data and E Health Easy to understand examples on how to create your own blockchain supported by case studies of blockchain in different industries Covers big data analytics examples using R

Includes lllustrative examples in python for blockchain creation   **Blockchain Technologies for Sustainable Development in Smart Cities** Swarnalatha, P.,Prabu, S.,2022-02-18 Blockchain technology has great potential to radically change our socio economic systems by guaranteeing secure transactions between untrusted entities reducing costs and simplifying many processes However employing blockchain techniques in sustainable applications development for smart cities still has some technical challenges and limitations Blockchain Technologies for Sustainable Development in Smart Cities investigates blockchain enabled technology for smart city developments and big data applications This book provides relevant theoretical frameworks and the latest empirical research findings in the area Covering topics such as digital finance smart city technology and data processing architecture this book is an essential reference for electricians policymakers local governments city committees computer scientists IT professionals professors and students of higher education researchers and academicians   Handbook of Green Computing and Blockchain Technologies Kavita Saini,Manju Khari,2021-12-26 This handbook provides a computational perspective on green computing and blockchain technologies It presents not only how to identify challenges using a practical approach but also how to develop strategies for addressing industry challenges Handbook of Green Computing and Blockchain Technologies takes a practical oriented approach including solved examples and highlights standardization industry bodies and initiatives Case studies provide a deeper understanding of blockchain and are related to real time scenarios The handbook analyzes current research and development in green computing and blockchain analytics studies existing related standards and technologies and provides results on implementation challenges and issues in today s society FEATURES Analyzes current research developments in green computing and blockchain analytics Provides an analysis of implementation challenges and solutions Offers innovations in the decentralization process for the application of blockchain in areas such as healthcare government services agriculture supply chain financial ecommerce and more Discusses the impact of this technology on people s lives the way they work and learn and highlights standardization industry bodies and initiatives This handbook will benefit researchers software developers and undergraduate and postgraduate students in industrial systems manufacturing information technology computer science manufacturing communications and electrical engineering   **Blockchain and Machine Learning Innovations** Sheikh Mohammad Idrees,Roshan Jameel,Mariusz Nowostawski,2025-07-02 In a world driven by data and decentralization blockchain and machine learning are transforming industries at an unprecedented pace The book Blockchain and Machine Learning Innovations explores the powerful convergence of these groundbreaking technologies offering an in depth look at how they are reshaping the future in innovative and exciting ways Packed with expert insights real world applications and forward thinking concepts this book provides a comprehensive guide to the opportunities and challenges at this intersection It uncovers solutions to critical issues offering practical frameworks and ideas for professionals researchers and tech enthusiasts alike Discover how blockchain and AI ML combine to power next generation solutions Gain inspiration from real

world examples and transformative ideas driving innovation Strike a balance between exploration and implementation helping readers leverage blockchain and machine learning effectively Whether you re a tech visionary a researcher or simply curious about the future this book equips you with the knowledge to lead in the age of decentralized intelligence Your journey into the next era of technology starts here Blockchain and Machine Learning Innovations a must read for anyone ready to explore the possibilities and shape the future **Convergence of Blockchain and Explainable Artificial Intelligence** Akansha Singh,Krishna Kant Singh,2024-10-30 Explainable AI XAI is an upcoming research field in the domain of machine learning This book aims to provide a detailed description of the topics related to XAI and Blockchain These two technologies can benefit each other and the research outcomes will benefit society in multiple ways Existing AI systems make decisions in a black box manner Explainable AI delineates how an AI system arrived at a particular decision It inspects the steps and models that are responsible for making a particular decision It is an upcoming trend that aims at providing explanations to the AI decisions Blockchain is emerging as an effective technique for XAI It enables accessibility to digital ledgers amongst the various AI agents The AI agents collaborate using consensus and decisions are saved on Blocks These blocks can be traced back but cannot be changed Thus the combination of AI with blockchain provides transparency and visibility to all AI decisions BlockXAI is also being widely used for improving data security and intelligence The decisions made are consensus based and decentralized leading to highly efficient AI systems This book also covers topics that present the convergence of Blockchain with explainable AI and will provide researchers academics and industry experts with a complete guide to BlockXAI *Integrating Artificial Intelligence and Machine Learning with Blockchain Security* D. Jeya Mala,R. Ganesan,2023-09-13 Due to its transparency and dependability in secure online transactions blockchain technology has grown in prominence in recent years Several industries including those of finance healthcare energy and utilities manufacturing retail marketing entertainment and media supply chains e commerce and e business among others use blockchain technology In order to enable intelligent decision making to prevent security assaults particularly in permission less blockchain platforms artificial intelligence AI techniques and machine learning ML algorithms are used By exploring the numerous use cases and security methods used in each of them this book offers insight on the application of AI and ML in blockchain security principles The book argues that it is crucial to include artificial intelligence and machine learning techniques in blockchain technology in order to increase security **Blockchain and Deep Learning** Khaled R. Ahmed,Henry Hexmoor,2022-03-25 This book introduces to blockchain and deep learning and explores and illustrates the current and new trends that integrate them The pace and speeds for connectivity are certain on the ascend Blockchain and deep learning are twin technologies that are integral to integrity and relevance of network contents Since they are data driven technologies rapidly growing interests exist to incorporate them in efficient and secure data sharing and analysis applications Blockchain and deep learning are sentinel contemporary research technologies This book provides a

comprehensive reference for blockchain and deep learning by covering all important topics It identifies the bedrock principles and forward projecting methodologies that illuminate the trajectory of developments for the decades ahead

Regulatory Aspects of Artificial Intelligence on Blockchain Tehrani, Pardis Moslemzadeh,2021-09-24 The convergence of Artificial Intelligence AI in blockchain creates one of the world s most reliable technology enabled decision making systems that is virtually tamper proof and provides solid insights and decisions The integration of AI and Blockchain affects many aspects from food supply chain logistics and healthcare record sharing to media royalties and financial security It is imperative that regulatory standards are emphasized in order to support positive outcomes from the integration of AI in blockchain technology Regulatory Aspects of Artificial Intelligence on Blockchain provides relevant legal and security frameworks and the latest empirical research findings in blockchain and AI Through the latest research and standards the book identifies and offers solutions for overcoming legal consequences that pertain to the application of AI into the blockchain system especially concerning the usage of smart contracts The chapters while investigating the legal and security issues associated with these applications also include topics such as smart contacts network vulnerability cryptocurrency machine learning and more This book is essential for technologists security analysts legal specialists privacy and data security practitioners IT consultants standardization professionals researchers academicians and students interested in blockchain and AI from a legal and security viewpoint **Convergence of Blockchain and Explainable Artificial Intelligence** Akansha Singh,Krishna Kant Singh,2024-10-30 Explainable AI XAI is an upcoming research field in the domain of machine learning This book aims to provide a detailed description of the topics related to XAI and Blockchain These two technologies can benefit each other and the research outcomes will benefit society in multiple ways Existing AI systems make decisions in a black box manner Explainable AI delineates how an AI system arrived at a particular decision It inspects the steps and models that are responsible for making a particular decision It is an upcoming trend that aims at providing explanations to the AI decisions Blockchain is emerging as an effective technique for XAI It enables accessibility to digital ledgers amongst the various AI agents The AI agents collaborate using consensus and decisions are saved on Blocks These blocks can be traced back but cannot be changed Thus the combination of AI with blockchain provides transparency and visibility to all AI decisions BlockXAI is also being widely used for improving data security and intelligence The decisions made are consensus based and decentralized leading to highly efficient AI systems This book also covers topics that present the convergence of Blockchain with explainable AI and will provide researchers academics and industry experts with a complete guide to BlockXAI *Deep Learning and Blockchain Technology for Smart and Sustainable Cities* Subramaniyaswamy V,G Revathy,Logesh Ravi,N. Thillaiarasu,Naresh Kshetri,2025-05-22 In this digital era a smart city can become an intelligent society by using advances in emerging technologies Specifically the rapid adoption of deep learning DL in fusion with blockchain technology has led to a new digital smart city ecosystem A broad spectrum of DL and blockchain

applications promises solutions for problems in areas ranging from risk management and financial services to cryptocurrency to public and social services Furthermore the convergence of artificial intelligence and blockchain technology is revolutionizing the smart city network architecture to build sustainable ecosystems However these advances in technology bring both opportunities and challenges in creating sustainable smart cities To help planners and developers to meet these challenges and exploit these opportunities Deep Learning and Blockchain Technology for Smart and Sustainable Cities takes a deep dive into the technologies and applications that enable smart and sustainable cities It provides a comprehensive literature review of the security issues and problems that impact the deployment of blockchain systems in smart cities It presents a detailed discussion of key factors in the convergence of blockchain and DL technologies that help form sustainable smart societies This book also discusses blockchain security enhancement solutions and summarizes main key points necessary for developing various blockchain and DL based intelligent transportation systems This book concludes with a discussion of open issues and future research direction These include new security suggestions and guidelines for a sustainable smart city ecosystem Also discussed is 6G enabled DL and blockchain in real time applications   The Data-Driven Blockchain Ecosystem Alex Khang,Subrata Chowdhury,Seema Sharma,2022-12-29 This book focuses on futuristic approaches and designs for real time systems and applications as well as the fundamental concepts of including advanced techniques and tools in models of data driven blockchain ecosystems The Data Driven Blockchain Ecosystem Fundamentals Applications and Emerging Technologies discusses how to implement and manage processes for releasing and delivering blockchain applications It presents the core of blockchain technology IoT based and AI based blockchain systems and various manufacturing areas related to Industry 4 0 The book illustrates how to apply design principles to develop and manage blockchain networks and also covers the role that cloud computing plays in blockchain applications All major technologies involved in blockchain embedded applications are included in this book which makes it useful to engineering students researchers academicians and professionals interested in the core of blockchain technology   Blockchain and the Public Sector Christopher G. Reddick,Manuel Pedro Rodríguez-Bolívar,Hans Jochen Scholl,2021-01-28 This book discusses blockchain technology and its potential applications in digital government and the public sector With its robust infrastructure and append only record system blockchain technology is being increasingly employed in the public sector specifically where trustworthiness and security are of importance Written by leading scholars and practitioners this edited volume presents challenges benefits regulations frameworks taxonomies and applications of blockchain technology in the public domain Specifically the book analyzes the implementation of blockchain technologies in the public sector and the potential reforms it would bring It discusses emerging technologies and their role in the implementation of blockchain technologies in the public sector The book details the role of blockchain in the creation of public value in the delivery of public sector services The book analyzes effects impacts and outcomes from the implementation of blockchain technologies in the public sector in select case

studies Providing up to date information on important developments regarding blockchain in government around the world this volume will appeal to academics researchers policy makers public managers international organizations and technical experts looking to understand how blockchain can enhance public service delivery   *Blockchain Government* Myungsan Jun,2018-06-15 Today more than 100 blockchain projects created to transform government systems are being conducted in more than 30 countries What leads countries rapidly initiate blockchain projects I argue that it is because blockchain is a technology directly related to social organization Unlike other technologies a consensus mechanism form the core of blockchain Traditionally consensus is not the domain of machines but rather humankind However blockchain operates through a consensus algorithm with human intervention once that consensus is made it cannot be modified or forged Through utilization of Lawrence Lessig s proposition that Code is law I suggest that blockchain creates absolute law that cannot be violated This characteristic of blockchain makes it possible to implement social technology that can replace existing social apparatuses including bureaucracy Government is a social technology that exists through social consensus serving to ensure trust among anonymous individuals in an expanded community likewise the blockchain though varying in its nature as a physical social technology is specifically designed to ensure trust among anonymous individuals When we investigate the functions of government in detail various devices for providing trust to society operate in various areas and at various levels In terms of ensuring trust governments have many different ways of performing the same role The newly developed technology of the blockchain is revolutionary in offering the first ever mechanism to ensure trust In summary there are three close similarities between blockchain and bureaucracy First both of them are defined by the rules and execute predetermined rules Second both of them work as information processing machines for society Third both of them work as trust machines for society Therefore I posit that it is possible and moreover unavoidable to replace bureaucracy with blockchain systems In conclusion I suggest five principles that should be adhered to when we replace bureaucracy with the blockchain system 1 introducing Blockchain Statute law 2 transparent disclosure of data and source code 3 implementing autonomous executing administration 4 building a governance system based on direct democracy and 5 making Distributed Autonomous Government DAG
