Access Control Time Attendance Management System:

Secured Techno- Economic Growth of India Dr. P. Sekhar, The book explores sector wise dimensions of security and how security undermines India's capacity to provide opportunities and services to help people sustain livelihoods. In addition, it focuses on some non-traditional security issues relative to each sector and their security implications for India. While India will continue to grow at a healthy rate, it is important for India to provide a stable economic environment in which we can grow rapidly and attract investments. The object of economic activity in any country is to promote the well-being and standard of living of the people. This book is an exhaustive effort to overview India as a nation which has a sound economic and social infrastructure. The economic infrastructure includes the roads, airports, railways, ports, telecom, and power. Education and training, tourism, and health services are included in the social infrastructure. It also reflects on the fact that, despite being a highly industrialized country, agriculture is the main occupation of the people of India. This book examines growth experience in various states, region, and sectors of the India's and Growth components of India. This Book describes policies, roles, and responsibilities and the concept of operations for assessing, prioritizing, protecting, and restoring critical infrastructure and key resources (CIKR) of the India and its territories and possessions during actual or potential security risks. Hence, the book attempts to identify principal drivers of the economy in India and their contribution to economic growth. The sectors are Industry, Power, Education, Agriculture, Healthcare, Telecom, Banking, Real estate, Transport, Tourism, etc. The entire growth process will come to a screeching halt if security concerns are not timely and adequately addressed, and the value addition comes with prevention, response, restoration, and recovery efforts when there is full participation of government and industry partners.
