Fire Fighting Pumping Systems at Industrial Facilities Dennis P. Nolan, 2011-06-10 Written from the perspective of industrial users this is the only book that describes how to install an effective firewater pumping system in a pragmatic and budget conscious way rather than with purely the regulatory framework in mind Based on the wide ranging industrial experience of the author this book is also the only one that deals with the particular risks and requirements of off shore facilities This book takes the reader beyond the prescriptive requirements of the fire code NFPA UL and considers how to make the best choice of design for the budget available as well as how to ensure the other components of the pumping system and supporting services are optimized The only alternative to guides written by regulatory enforcement bodies this book is uniquely practical and objective demonstrating how and why the standards need to be met Covers a wide range of industries including those with exceptional requirements such as off shore petroleum facilities and chemical plants Written by someone who has been responsible for the safety of large numbers of workers and billions of dollars worth of equipment for those in similarly responsible positions
