2017 Annual Report Procter Gamble:

Retail Therapy Mark Pilkington, 2019-01-10 Almost weekly the news is full of stories about disappearing retail chains. From House of Fraser and BHS to Toys R Us and Sears, recognised names are vanishing overnight as such large organizations disappear. So the malls, shopping centres, high streets and main streets become emptier and less appealing to visit. The retail sector is hugely important in terms of job numbers: in the US it employs around 30 million people directly and indirectly; in the UK around 10 million. As such, anything that jeopardises the retail sector will have a deep and lasting impact on millions of lives as well as on public policy. While many blame the Amazon effect, this is an oversimplification. Deeper forces are at work that are changing people's relationships with brands, the balance of power between producers and consumers, and the whole nature of the supply chain that has existed since the industrial revolution. *Retail Therapy* offers a comprehensive analysis of these forces and their impact on the world of retailing. More importantly, it presents a cogent analysis of the longer-term trends that are shaping retailing and outlines a clear road map for sustainable success in the future.

Roadmapping Future Tuğrul U. Daim, 2021-03-16 This volume presents a portfolio of cases and applications on technology roadmapping (TRM) for products and services. It provides a brief overview on criteria or metrics used for evaluating the success level of TRM and then offers six case examples from sectors such as transportation, smart technologies and household electronics. A new innovation in this book is a section of detailed technology roadmap samples that technology managers can apply to emerging technologies.

Marketing and Globalization Aurélia Durand, 2018-07-17 This concise text focuses squarely on the issues facing marketers in an increasingly global world. It identifies several trends linking them together and positioning them as marketing practices that companies implement as a way of responding to the major consequences of globalization. The book also includes case studies to illustrate new practices and allow students to discuss issues of market selection, entry modes, segmentation, targeting and positioning, as well as product price distribution, promotion and corporate communication policies in a globalized world. Durand's unique approach moves beyond marketing management and strategy issues and provides students with the broader context to understand the marketing practices they'll use in the real world. This book will prove to be an essential resource for any student of marketing and international business working to stay ahead in an increasingly competitive and global industry.

Constructing Leadership 4.0 Richard Kelly, 2018-11-27 The Fourth Industrial Revolution signals a sea change in the way we lead our organisations. Moving away from relational leadership and horizontal organisationally led development, it is imperative that business leaders are able to adapt to more networked organisations and shift away from dated assumptions of positional power. *Constructing Leadership 4.0* breaks new ground by explaining the urgent challenges facing managers and business leaders. It will teach you how to approach leadership development as a system rather than a programme. Develop an organisational ecosystem to support leadership 4.0. Build collaborative networks. Cultivate a responsive mindset through sensemaking. Use non-classroom based
