Imposter Syndrome and AI: Navigating Human Identity in the Age of Intelligent Machines Razzak Janjua, Laeeq,Edina, Kozma Dorottyia,Singh, Bhupinder,2026-01-28 With the rapid advancements in artificial intelligence AI the boundaries between human capability and machine intelligence are increasingly blurred As AI demonstrates creativity and problem solving mimicry once thought to be uniquely human many individuals find themselves questioning their own value and authenticity as a manifestation of imposter syndrome The rise of intelligent

technology not only transforms industries and daily life but also challenges our understanding of what it means to be truly intelligent or even human. Imposter Syndrome and AI Navigating Human Identity in the Age of Intelligent Machines explores how AI is changing humans definition of identity. The book explains the psychological and emotional impact about the development and exacerbation of impostor syndrome in an increasingly developed AI world. Covering topics such as artificial intelligence, human identity and psychology, this book is an excellent resource for educators, academicians, policymakers, technology developers, human resource leaders and graduate students.

The Routledge Handbook of Communication and Social Cognition Torsten Reimer, Lyn M. van Swol, Arnd Florack, 2026-02-26. This handbook provides a comprehensive understanding of theory, research and applications of research in communication and social cognition. Written by leading figures across an array of disciplines, chapters in this handbook explicate the interplay of communication and social cognition to form a vantage point for the study of concepts such as framing, stereotypes, social perceptions, mood and affect, intergroup conflict, media effects, decision making and language and thought that are widely used in the social cognitive and behavioral sciences. The book is divided into seven sections; the first two sections reflect basic discussions about how processes of thought and communication are related and how social realities are influenced by aspects of communication. Sections 3-6 address specified fields including interpersonal communication, communication between groups, digital communication and communication in applied fields of marketing, media and health, and the final section describes innovative methods to pursue the study of communication and social cognition. This handbook integrates advances in theory and research that are rooted in and will be of interest to the fields of communication, psychology, cognitive science, media studies, linguistics, marketing, public health, management and organizational studies.

[Complex Interventions in Health](#) David A. Richards, Ingalill Rahm Hallberg, Carole Estabrooks, Sascha Köpke, Gabriele Meyer, Lars Wallin, Yvonne Wengström, Joanne Woodford, 2026-03-05. Extensively updated in light of the UK Medical Research Council's MRC latest guidance on complex intervention research methods in health and social care, this important book provides the most comprehensive resource available to understand and apply the range of methodologies available to researchers and practitioners today. After an introductory chapter detailing the history of and future challenges for complex interventions research, and two chapters on patient and public involvement, the book is split into four discrete but interconnected parts. Section I explores the development phase of complex interventions, covering theory building, adaptation of existing interventions, interest holder involvement, and context consideration, setting the foundation for successful research programmes. Section II examines feasibility testing of complex interventions, addressing uncertainties in intervention design, methodology, and procedures before determining whether to stop, amend, or proceed to full evaluation. Section III presents evaluation methodologies for complex interventions, covering trial designs, process evaluation, economic assessment, data registries, population approaches, theory-based methods, and simulation modelling. Section IV addresses implementation science methodologies for translating complex interventions into practice, addressing theories, adaptation, hybrid designs, diffusion, and collaborative approaches. The concluding chapter asks readers to reflect on the importance of initiating collaborative programmatic research groups. With a renewed focus on the context of complex interventions, including concise summaries of the latest thinking, this is essential reading for any researcher or practitioner in health and social care.
