do not reliably ripen 300 metres above sea level Cultural imagination cannot alter these realities but it can variously view them as dangerous or picturesque as economic or uneconomic The book is a history of changing reflexivity in the interactions between people culture and nature The book is structured as a chronological narrative It is written with unusual grace wit and clarity and illustrated with 50 photographs and some 60 maps and diagrams all specially prepared for this book The author draws on a very wide range of sources and uses scientific evidence as well as the conventional historical record as well as on his own experience of the landscapes of Britain This is cultural and natural history at its best with a wide appeal within and without the academy *CD Review Digest* ,1994 The guide to English language reviews of all music recorded on compact discs
