Burger, 1992 Covers basic geophysical techniques used in environmental and groundwater analysis for advanced students in geology and civil engineering and for working professionals

Encyclopedia of Global Resources Craig Willard Allin, 2010 The topic of our natural resources has become an important issue over the last few years The abundance of some and scarcity of others has sparked many a debate The four volumes in this set discuss not only the aspects of the resources themselves but their economic and social impact as well Plus complimentary online access is provided through Salem Science *Journal of Geoscience Education*, 1996 *The British National Bibliography* Arthur James Wells, 2006 *From Archive to Process* Deutscher Arbeitskreis für Geomorphologie. Tagung, 2008 *Site Characterization in Karst and Pseudokarst Terraines* Richard C. Benson, Lynn B. Yuhr, 2015-09-24 This book provides a practical strategy for obtaining a more complete and accurate geologic site characterization The strategy and methods to characterize complex geologic settings are readily available The strategy utilizes readily available technology basic science and good old fashioned common sense resulting in a solid understanding of geologic and even karst or pseudokarst conditions We provide an introduction to many off the shelf methods available for site characterization as well as examples of their application throughout the book The purpose of a geologic site characterization is to understand the 3 dimensional geologic framework along with the engineering and hydrologic properties of a site including any man made impacts A well done site characterization is the cornerstone of all geotechnical groundwater and environmental projects The geologic conditions particularly karst conditions can significantly impact a site including its structural stability groundwater pathways and potential for rapid transport or traps for contaminants Once we have adequately characterized the geologic conditions can we carry our remediation design and construction model flow and make risk assessments that are accurate and reliable
