Introduction To Non Euclidean Geometry:

Introduction to Non-Euclidean Geometry Harold E. Wolfe, 2013-09-26 College level text for elementary courses covers the fifth postulate hyperbolic plane geometry and trigonometry and elliptic plane geometry and trigonometry Appendixes offer background on Euclidean geometry Numerous exercises 1945 edition [Introduction to Non-Euclidean Geometry](#) EISENREICH, 2014-06-28 An Introduction to Non Euclidean Geometry covers some introductory topics related to non Euclidian geometry including hyperbolic and elliptic geometries This book is organized into three parts encompassing eight chapters The first part provides mathematical proofs of Euclid s fifth postulate concerning the extent of a straight line and the theory of parallels The second part describes some problems in hyperbolic geometry such as cases of parallels with and without a common perpendicular This part also deals with horocycles and triangle relations The third part examines single and double elliptic geometries This book will be of great value to mathematics liberal arts and philosophy major students [Introduction to Non-Euclidean Geometry](#) Harold Eichholtz Wolfe, 2012-04-01 **Introduction to Non-Euclidean Geometry** Arthur Meier Schlesinger, 1945 [Introductory Non-Euclidean Geometry](#) Henry Parker Manning, 2013-01-30 This fine and versatile introduction begins with the theorems common to Euclidean and non Euclidean geometry and then it addresses the specific differences that constitute elliptic and hyperbolic geometry 1901 edition *An Introduction to Non-Euclidean Geometry and Its Models* Julia B. Hiles, 2006 *Non-euclidean Geometry* Henry Parker Manning, 2017-07-06 A versatile introduction to non Euclidean geometry is appropriate for both high school and college classes Its first two thirds requires just a familiarity with plane and solid geometry and trigonometry and calculus is employed only in the final part It begins with the theorems common to Euclidean and non Euclidean geometry and then it addresses the specific differences that constitute elliptic and hyperbolic geometry Major topics include hyperbolic geometry single elliptic geometry and analytic non Euclidean geometry **The Non-Euclidean Revolution** Richard J. Trudeau, 2013-12-01 Richard Trudeau confronts the fundamental question of truth and its representation through mathematical models in *The Non Euclidean Revolution* First the author analyzes geometry in its historical and philosophical setting second he examines a revolution every bit as significant as the Copernican revolution in astronomy and the Darwinian revolution in biology third on the most speculative level he questions the possibility of absolute knowledge of the world Trudeau writes in a lively entertaining and highly accessible style His book provides one of the most stimulating and personal presentations of a struggle with the nature of truth in mathematics and the physical world A portion of the book won the Plya Prize a distinguished award from the Mathematical Association of America [The Non-Euclidean Revolution](#) Richard J.
