Extracting Development Oliver Tappe, Simon Rowedder, 2022-10-10 Resource extraction is currently shaping Southeast Asian landscapes and people s lives to an unprecedented degree This volume explores old and new resource frontiers their effect on local economies and social relations and questions of contested resource control and governance Case studies from Laos Thailand Myanmar and Cambodia illustrate the

predicament of globalized extractivism processes in the region particularly but not only with regard to China's rising geopolitical and economic influence most prominently expressed by the Belt and Road Initiative. Discussing transboundary investments in land and water reserves and localized commodification processes of agrarian resources, this volume not only investigates the competing actors and discourses of resource extraction in Southeast Asia. What is more, the different case studies shed light on the contingent outcomes on the ground of transregional economic dynamics and related socio-ecological transformations. Combining macro perspectives with fine-grained micro-scale studies, this volume offers a multi-faceted picture of extractivism in contemporary Southeast Asia.

Comparative Labour Law and Industrial Relations in Industrialized Market Economies Roger Blanpain, 2007. Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due to the growth of multinational enterprises. And the impact of international and regional organizations aspiring to harmonize rules. The growing need for comprehensive up-to-date and readily available information on labour law and industrial relations in different countries led to the publication of the International Encyclopaedia for Labour Law and Industrial Relations. In which more than 70 international and national monographs have thus far been published. This book, Comparative Labour Law and Industrial Relations in Industrialized Market Economies, goes a step further than the Encyclopaedia in as much as most of the chapters provide comparative and integrated thematic treatment. The aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world. This book is obviously not exhaustive with respect to the coverage of countries and topics. The authors limit themselves mainly to the industrialized market economies. The book is divided in three main parts: an introduction relating to methodology and documentation including the use of Internet. The second part concerns international actors like the International Employers' Organisations and the International Trade Union Movement. As well as Human Resources Management. The third concerns the sources of regulation concentrating on International and European Labour Law as well as on Codes of Conduct for Multinational Enterprises and describes also the rules in case of conflict of laws. The last part deals with international developments and comparative studies in not less than 15 chapters. The IXth edition will like the previous editions serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations; it will also provide labour lawyers with the necessary insights to cope with a world which is increasingly international.

Annual Report on the OECD Guidelines for Multinational Enterprises 2014 Responsible Business Conduct by Sector OECD, 2014-12-18. This 14th annual report on the OECD Guidelines for Multinational Enterprises describes the activities undertaken to promote the observance of the Guidelines during the implementation cycle of June 2013-June 2014.

Comparative Labour Law Principles and Methods Industrial Relations in Industrialized Market Economies Greg Bamber, 2001-06-22. Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due

To The globalisation of the economy The massive introduction of new information technology The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules the growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led To The publication of the International Encyclopaedia for Labour Law and Industrial Relations In which almost 70 international and national monographs have been published thus far This book goes a step further than the Encyclopaedia inasmuch as most of the chapters provide comparative and integrated thematic treatment Our aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world Encouraged by the warm reception of the first six editions we hope that also the seventh edition will serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations We hope too that the book will provide labour lawyers HRM and industrial relations specialists with the necessary insights to cope with a world which is increasingly international *Report on Working Children and Women in Myanmar's Urban Informal Sector* ,1997

Labour Rights as Human Rights Philip Alston,2005 Are efforts to protect workers rights compatible with the forces of globalization How can minimum standards designed to protect labor rights be implemented in a world in which national labor law is more and more at the mercy of international forces beyond its control The contributors to this volume argue that international agreements and institutions are of central importance if labor rights are to be protected in a globalized economy exploring some of the options that are open to governments civil society and the labor movement in the years ahead

Asia Business Law Review ,1999 *Workers' Rights for the New Century* Stephen Frost,2003 *Assessment of Labour Provisions in Trade and Investment Arrangements* International Labor Office,2016 Nearly half of trade agreements concluded in the past five years included either a labor chapter or labor provision that makes reference to international labor standards and ILO instruments The evidence so far suggests that labor provisions have been an important tool for raising awareness and improving laws and legislations with respect to workers rights increasing stakeholder involvement in negotiation and implementation phases and developing domestic institutions to better monitor and enforce labor standards But challenges remain particularly with respect to sustainability of impacts coherence and cooperative efforts This new report part of the Studies on Growth with Equity series gives a full examination of the scope and effectiveness of these labor provisions *Doing Business in Asia* ,2005 **The Status of Myanmar Women** Ni Ni Myint,2002 Research on Myanmar women including famous women in history *Myanmar's Working Children in Urban Informal Sector* ,1997
