5G Wireless Network Security and Privacy DongFeng Fang,Yi Qian,Rose Qingyang Hu,2023-12-26 An expert presentation of 5G security privacy and network performance In *5G Wireless Network Security and Privacy* a team of veteran engineers delivers a robust and accessible discussion of 5G security solutions including physical layer security authentication and mobility management In the book the distinguished authors expertly cover the requirements of 5G wireless network security and privacy with explorations of existing solutions and vulnerabilities from security architecture and mechanism perspectives Readers will learn to enhance the security and network performance of 5G wireless networks in contexts like vehicle to vehicle and vehicle to infrastructure communications industrial automation health services smart cities and smart homes

They will develop a comprehensive understanding of 5G wireless network security as they move through the book's 11 insightful chapters developing in depth knowledge on the current state of 5G security and coming developments in the field. Readers will also find a thorough introduction to legacy cellular network security including network performance development from 1G to 4G. In depth treatments of 5G network security including the motivation and objectives of 5G wireless network security. Comprehensive explorations of wireless security solutions including cryptographic approaches and physical layer security. Fulsome discussions of the security architecture of cellular networks including 3G and 4G security. Perfect for researchers and professionals working in the field of cybersecurity and 5G wireless networks. 5G Wireless Network Security and Privacy will also earn a place in the libraries of engineers, computer scientists, and graduate students studying 5G network security and privacy.

A Comprehensive Guide to 5G Security Madhusanka Liyanage, Ijaz Ahmad, Ahmed Bux Abro, Andrei Gurtov, Mika Ylianttila, 2018-03-19. The first comprehensive guide to the design and implementation of security in 5G wireless networks and devices. Security models for 3G and 4G networks based on Universal SIM cards worked very well. But they are not fully applicable to the unique security requirements of 5G networks. 5G will face additional challenges due to increased user privacy concerns, new trust and service models, and requirements to support IoT and mission-critical applications. While multiple books already exist on 5G, this is the first to focus exclusively on security for the emerging 5G ecosystem. 5G networks are not only expected to be faster but provide a backbone for many new services such as IoT and the Industrial Internet. Those services will provide connectivity for everything from autonomous cars and UAVs to remote health monitoring through body-attached sensors, smart logistics through item tracking, to remote diagnostics and preventive maintenance of equipment. Most services will be integrated with Cloud computing and novel concepts such as mobile edge computing which will require smooth and transparent communications between user devices, data centers, and operator networks. Featuring contributions from an international team of experts at the forefront of 5G system design and security, this book provides priceless insights into the current and future threats to mobile networks and mechanisms to protect it. Covers critical lifecycle functions and stages of 5G security and how to build an effective security architecture for 5G-based mobile networks. Addresses mobile network security based on network-centricity, device-centricity, information-centricity, and people-centricity views. Explores security considerations for all relative stakeholders of mobile networks including mobile network operators, mobile network virtual operators, mobile users, wireless users, Internet of things, and cybersecurity experts. Providing a comprehensive guide to state-of-the-art in 5G security theory and practice.

A Comprehensive Guide to 5G Security is an important working resource for researchers, engineers, and business professionals working on 5G development and deployment.
