

**Geography** is the study of the earth's landscapes, peoples, places and environments. It is, quite simply, about the world in which we live and how we are all connected through processes.

## What should I already know?

- Name and locate the world's seven continents and five oceans.
- Name and locate the four countries of the United Kingdom, the four capital cities and counties.
- Understand geographical similarities and differences of urban and physical areas

## Key Vocabulary and Definitions

<b>Human</b>	A study of the people, work, lifestyles and settlements.
<b>Physical</b>	A study of the natural features of the earth.
<b>Environmental</b>	A study of the ways the earth's environment is affected by humans.
<b>Sustainable</b>	Meeting our needs of the planet, without harming it for others in the future.

## Compass Directions

## Important Map Skill Facts

### Grid References

GRs help us find places on a map. Remember to always go along the corridor and then up the stairs.  
EG: 4-figure GR for the blue square would be in 42 33 and the 6-figure is 425 333.

### Scale

To work out distances we can use the scale bar. We can use paper, string or a ruler to measure distances. This helps us real distances. E.g. 4cm = 2km.

### Contours

Contours show us the height of the land: how steep or flat land is. If the lines are closer together it is steep land, if they are further apart it is flatter.

### Map Key

The key that you find on OS Maps is like a menu and tells us what each symbol represents - "a key unlocks the map's information."

Urban =  
City/Town

Rural =  
Countryside
