**Digital developments and employment** Wilma Viviers ,Ali Parry,Emmanuel Orkoh ,Susara J. Jansen van Rensburg,2024-07-31 There is broad consensus in the literature that job creation and productive employment are critical for building a vibrant inclusive economy The digital era has the potential to expand employment by creating new professional pathways and market opportunities particularly in Africa which has high levels of unemployment and considerable room for enhanced economic activity However advancing digital technologies also pose risks and concerns notably that machines will increasingly take over the jobs of humans The effects of digital developments on employment therefore warrant thorough investigation This book delves into the effects of digital developments on employment in Africa using both qualitative and quantitative research methods An important premise in the book is that employment is a leading determinant of inclusive growth which has become a policy imperative across the continent Despite a wide range of views on digital developments and employment there is no well established empirically determined relationship between these two phenomena in Africa which makes policy making difficult The book addresses this research gap giving specific attention to the fact that African

countries are far from homogeneous evidenced by their highly diverse economic activities and varying levels of development. The book is essential reading for scholars in the development economics discipline who have an interest in policy studies and in gaining a holistic appreciation of the employment effects of digital developments in Africa. Such insights will go a long way towards shaping countries' economic and digital policies and putting the continent onto a steadier path towards its digital future.

**Management Development Series**, 1964    *Oceanite*, 1969    **Research Companion to Construction Economics** Ofori, George, 2022-03-15. This innovative Research Companion considers the history, nature and status of construction economics and its need for development as a field in order to be recognised as a distinct discipline. It presents a state-of-the-art review of construction economics, identifying areas for further research.    [The National Union Catalogs, 1963-1964](#)
