Information Theory, 2000 Error Coding for Engineers. A. Houghton, 2012-12-06. Error Coding for Engineers provides a useful tool for practicing engineers, students and researchers focusing on the applied rather than the theoretical. It describes the processes involved in coding messages in such a way that if errors occur during transmission or storage they are detected and if necessary corrected. Very little knowledge beyond a basic understanding of binary manipulation and Boolean algebra is assumed, making the subject accessible to a broad readership including non-specialists. The approach is tutorial, numerous examples, illustrations and tables are included along with over 30 pages of hands-on exercises and solutions. Error coding is essential in many modern engineering applications. Engineers involved in communications design, DSP based applications, IC design, protocol design, storage solutions and memory product design are among those who will find the book to be a valuable reference. Error Coding for Engineers is also suitable as a text for basic and advanced university courses in communications and engineering.
