**Digital Communication Systems Using MATLAB and Simulink** Dennis Silage, 2009 Digital Communication using MATLAB and Simulink is intended for a broad audience For the student taking a traditional course the text provides simulations of the MATLAB and Simulink systems and the opportunity to go beyond the lecture or laboratory and develop investigations and projects For the professional the text facilitates an expansive review of and experience with the tenets of digital communication systems *Modeling of Digital Communication Systems Using SIMULINK* Arthur A. Giordano, Allen H. Levesque, 2015-03-31 A comprehensive and detailed treatment of the program SIMULINK that focuses on SIMULINK for simulations in Digital and Wireless Communications Modeling of Digital Communication Systems Using SIMULINK introduces the reader to SIMULINK an extension of the widely used MATLAB modeling tool and the use of SIMULINK in modeling and simulating digital communication systems including wireless communication systems Readers will learn to model a wide selection of digital communications techniques and evaluate their performance for many important channel conditions Modeling of Digital Communication Systems Using SIMULINK is organized in two parts The first addresses Simulink models of digital communications systems using various modulation coding channel conditions and receiver processing techniques The second part provides a collection of examples including speech coding interference cancellation spread spectrum adaptive signal processing Kalman filtering and modulation and coding techniques currently implemented in mobile wireless systems Covers case examples progressing from basic to complex Provides applications for mobile communications satellite communications and fixed wireless systems that reveal the power of SIMULINK modeling Includes access to useable SIMULINK simulations online All models in the text have been updated to R2018a only problem sets require updating to the latest release by the user Covering both the use of SIMULINK in digital communications and the complex aspects of wireless communication systems Modeling of Digital Communication Systems Using SIMULINK is a great resource for both practicing engineers and students with MATLAB experience *MATLAB/Simulink for Digital Communication*, 2009 **Digital Signal Processing with Matlab Examples, Volume 1** Jose Maria Giron-Sierra, 2016-11-19 This is the first volume in a trilogy on modern Signal Processing The three books provide a concise exposition of signal processing topics and a guide to support individual practical exploration based on MATLAB programs This book includes MATLAB codes to illustrate each of the main steps of the theory offering a self contained guide suitable for independent study The code is embedded in the text helping readers to put into practice the ideas and methods discussed The book is divided into three parts the first of which introduces readers to periodic and non periodic signals The second part is devoted to filtering which is an important and commonly used application The third part addresses more advanced topics including the analysis of real world non stationary signals and data e g structural fatigue earthquakes electroencephalograms birdsong etc The book s last chapter focuses on modulation an example of the intentional use of non

stationary signals      Contemporary Communication Systems Using MATLAB John G. Proakis, Masoud Salehi, 1998 This text contains a large number of MATLAB based problems dealing with topics covered in a first course in communication systems Each chapter contains fundamental concepts briefly reviewed and presents illustration problems using MATLAB Each chapter contains a list of MATLAB files used      Digital Communication Systems Engineering with Software-defined Radio Di Pu, Alexander M. Wyglinski, 2013 For a senior level undergraduate course on digital communications this unique resource provides you with a practical approach to quickly learning the software defined radio concepts you need to know for your work in the field      Problem-Based Learning in Communication Systems Using MATLAB and Simulink Kwonghue Choi, Huaping Liu, 2016-02-10 Designed to help teach and understand communication systems using a classroom tested active learning approach Discusses communication concepts and algorithms which are explained using simulation projects accompanied by MATLAB and Simulink Provides step by step code exercises and instructions to implement execution sequences Includes a companion website that has MATLAB and Simulink model samples and templates password matlab

**Communication Systems Using MATLAB and Simulink** John G. Proakis, Masoud Salehi, Gerhard Bauch, 2004 Featuring a variety of applications that motivate students this book serves as a companion or supplement to any of the comprehensive textbooks in communication systems The book provides a variety of exercises that may be solved on the computer using MATLAB The authors assume that the student is familiar with the fundamentals of MATLAB By design the treatment of the various topics is brief The authors provide the motivation and a short introduction to each topic establish the necessary notation and then illustrate the basic concepts by means of an example

Communication Systems Modeling and Simulation using MATLAB and Simulink K. C. Raveendranathan, 2011-09-07 This is probably the first book that employs the technique of simulation experiments as a means of reinforcing the basic concepts of communication theory Undergraduate students are generally exposed to a mathematically rigorous treatment of communications theory but seldom have the benefit of a practical orientated approach employing modelling and simulation for a thorough assimilation of the subject This book can supplement any standard textbook to cover this significant lacuna in the existing learning methodology It uses MATLAB the language of the technical computing fraternity for the purpose The introductory chapters provide an overview of computer simulation and MATLAB programming concepts Thereafter communications concepts are presented in the traditional manner but followed up with appropriate simulations in MATLAB Simulink Relevant MATLAB source code is given whenever it is used to illustrate a point All the source code given in the text has been tested on MATLAB kernel version 7.10 Release R2010a and is provided in the accompanying CD
