Computer Programming with MATLAB J. Michael Fitzpatrick, Ákos Lédeczi, 2015 **An Introduction to Programming and Numerical Methods in MATLAB** Stephen Robert Otto, 2005 Learning Programming Using Matlab Khalid Sayood, 2006-12-01 This book is intended for anyone trying to learn the fundamentals of computer programming The chapters lead the reader through the various steps required for writing a program introducing the MATLAB constructs in the process MATLAB is used to teach programming because it has a simple programming environment It has a low initial overhead which allows the novice programmer to begin programming immediately and allows the users to easily debug their programs This is especially useful for people who have a mental block about computers Although MATLAB is a high level language and interactive environment that enables the user to perform computationally intensive tasks faster than with traditional programming languages such as C and Fortran the author shows that it can also be used as a programming learning tool for novices There are a number of exercises at the end of each chapter which should help users become comfortable with the language Programming for Computations - MATLAB/Octave Svein Linge, Hans Petter Langtangen, 2016-08-01 This book presents computer programming as a key method for solving mathematical problems There are two versions of the book one for MATLAB and one for Python The book was inspired by the Springer book TCSE 6 A Primer on Scientific Programming with Python by Langtangen but the style is more accessible and concise in keeping with the needs of engineering students The book outlines the shortest possible path from no previous experience with programming to a set of skills that allows the students to write simple programs for solving common mathematical problems with numerical methods in engineering and science courses The emphasis is on generic algorithms clean design of programs use of functions and automatic tests for verification *Programming in MATLAB* Marc E. Herniter, 2001 Perfect for use in a lab or by individuals PROGRAMMING IN MATLAB is designed to help anyone interested in electrical and computer engineering develop programming skills using MATLAB as the programming language The text is also applicable for those interested in utilizing MATLAB in industry MATLAB is quickly surpassing C BASIC and Fortran in engineering departments as the programming language of choice due to the many functions and toolboxes the program features It allows the many students who use it to write complex programs to solve a variety of technical problems efficiently Herniter offers a straightforward approach to learning the program and assumes no prior exposure to MATLAB The book offers comprehensive instructions for programming in MATLAB including specific output results and numerous MATLAB screen captures Its use is ideal in a lab lecture setting where readers can recreate examples and complete problem assignments However the text organization is also appropriate for use as a general reference guide for programming MATLAB Herniter introduces fundamental programming skills then moves into solving basic problems using built in MATLAB functions and finally into solving engineering problems using MATLAB *Programming Fundamentals Using MATLAB* Michael
