Open Systems Interconnection (OSI) model is a reference model developed by ISO (International Organization for Standardization) in 1984, as a conceptual framework of standards for communication in the network across different equipment and applications by different vendors. It is now considered the primary architectural model for inter-computing and internetworking communications.

Communication process has been divided into 7 layers.

- 1.physical
- 2.Datalink
- 3.network
- 4.transport
- 5.session
