*Mathematics of Deep Learning* Leonid Berlyand, Pierre-Emmanuel Jabin, 2023-04-27 The goal of this book is to provide a mathematical perspective on some key elements of the so called deep neural networks DNNs Much of the interest in deep learning has focused on the implementation of DNN based algorithms Our hope is that this compact textbook will offer a complementary point of view that emphasizes the underlying mathematical ideas We believe that a more foundational perspective will help to answer important questions that have only received empirical answers so far The material is based on a one semester course Introduction to Mathematics of Deep Learning for senior undergraduate mathematics majors and first year graduate students in mathematics Our goal is to introduce basic concepts from deep learning in a rigorous mathematical fashion e g introduce mathematical definitions of deep neural networks DNNs loss functions the backpropagation algorithm etc We attempt to identify for each concept the simplest setting that minimizes technicalities but still contains the key mathematics
