A Place Next to Satoshi Lennart Ante, 2020 Blockchain technology has become an ubiquitous

phenomenon While the topic originated in computer science the business and economics literature was comparatively slow to pick up on it To better understand the academic basis current developments and future research avenues of the discourse I analyse 467 blockchain and cryptocurrency articles and their 9 672 cited references from the fields of business and economics which I gather from the Web of Science Core Collection Five major strands of research are identified through factor analysis They are reviewed and their interrelation is mapped using social network analysis I find that research on I market efficiency and economics and II asset pricing and valuation is relatively mature and focuses on cryptocurrencies while research on III the principles and applications of blockchain technology IV transactions and anonymity and V monetary theory and policy lacks maturity I point out potential paths for future research and conclude that this young field of research still leaves plenty of room for manoeuvre A scientific place next to Nakamoto 2008 is still available for existing emerging and new research streams *Blockchain* Rajdeep Chakraborty, Anupam Ghosh, Valentina Emilia Balas, Ahmed A

Elngar, 2022-09-28 *Blockchain Principles and Applications in IoT* covers all the aspects of Blockchain and its application in IOT The book focuses on Blockchain its features and the core technologies that are used to build the Blockchain network The gradual flow of chapters traces the history of blockchain from cryptocurrencies to blockchain technology platforms and applications that are adopted by mainstream financial and industrial domains worldwide due to their ease of use increased security and transparency Focuses on application of Blockchain on IoT domain Focuses on Blockchain as a data repository Most books on Blockchain cover bitcoins and crypto currency This book will also cover blockchain in other areas like healthcare supply chain management etc Covers consensus algorithms like PAROX RAFT etc and its applications This book is primarily aimed at graduates and researchers in computer science and IT [Liberalising Blockchain](#) Arvin Kristopher Razon, 2019 Blockchain technology and the World Trade Organization share the same principles of liberalisation and democratisation of trade Relying on cross border data flows and an open environment blockchain platforms such as Bitcoin and smart contracts dispense with a central intermediary and distribute the function of validating transactions to a peer to peer network of participants who maintain and update a record of all transactions in a transparent and immutable distributed ledger The General Agreement on Trade in Services GATS as the only multilateral treaty that creates binding international obligations on the treatment to be accorded to service suppliers including online services provides a solid foundational framework for services supplied by participants on blockchain even if unsurprisingly several grey areas exist Applying GATS to blockchain means that many prohibitive regulations imposed by countries from banning mining to criminalising the possession of cryptocurrencies may be considered barriers to trade
