Interfaces Implementations Techniques Creating Reusable:

C Interfaces and Implementations David University, 1996 Every programmer and software project manager must master the art of creating reusable software modules they are the building blocks of large reliable applications Unlike some modern object oriented languages C provides little linguistic support or motivation for creating reusable application programming interfaces APIs While most C programmers use APIs and the libraries that implement them in almost every application they write relatively few programmers create and disseminate new widely applicable APIs C Interfaces and Implementations shows how to create reusable APIs using interface based design a language independent methodology that separates interfaces from their implementations This methodology is explained by example The author describes in detail 24 interfaces and their implementations providing the reader with a thorough understanding of this design approach Features of C Interfaces and Implementations Concise interface descriptions that comprise a reference manual for programmers interested in using the interfaces A guided tour of the code that implements each chapter's interface to help those modifying or extending an interface or designing related interfaces In depth focus on algorithm engineering how to package data structures and related algorithms into reusable modules Source code for 24 APIs and 8 sample applications is examined with each presented as a literate program in which a thorough explanation is interleaved with the source code Rarely documented C programming tricks of the trade Convenient access to all source code in the book via the World Wide Web at <http://www.cs.princeton.edu/software/cii>

Algorithms in C++, Parts 1-4 Robert Sedgewick, 1998-07-13 Robert Sedgewick has thoroughly rewritten and substantially expanded and updated his popular work to provide current and comprehensive coverage of important algorithms and data structures Christopher Van Wyk and Sedgewick have developed new C implementations that both express the methods in a concise and direct manner and also provide programmers with the practical means to test them on real applications Many new algorithms are presented and the explanations of each algorithm are much more detailed than in previous editions A new text design and detailed innovative figures with accompanying commentary greatly enhance the presentation The third edition retains the successful blend of theory and practice that has made Sedgewick's work an invaluable resource for more than 250 000 programmers This particular book Parts 1-4 represents the essential first half of Sedgewick's complete work It provides extensive coverage of fundamental data structures and algorithms for sorting searching and related applications Although the substance of the book applies to programming in any language the implementations by Van Wyk and Sedgewick also exploit the natural match between C classes and ADT implementations Highlights Expanded coverage of arrays linked lists strings trees and other basic data structures Greater emphasis on abstract data types ADTs modular programming object oriented programming and C classes than in previous editions Over 100 algorithms for sorting selection priority queue ADT implementations and symbol table ADT searching implementations New implementations of binomial queues multiway radix sorting randomized BSTs splay

trees skip lists multiway tries B trees extendible hashing and much more Increased quantitative information about the algorithms giving you a basis for comparing them Over 1000 new exercises to help you learn the properties of algorithms Whether you are learning the algorithms for the first time or wish to have up to date reference material that incorporates new programming styles with classic and new algorithms you will find a wealth of useful information in this book

Algorithms in Java, Parts 1-4 Robert Sedgwick, 2002-07-23 This edition of Robert Sedgwick's popular work provides current and comprehensive coverage of important algorithms for Java programmers Michael Schidlowsky and Sedgwick have developed new Java implementations that both express the methods in a concise and direct manner and provide programmers with the practical means to test them on real applications Many new algorithms are presented and the explanations of each algorithm are much more detailed than in previous editions A new text design and detailed innovative figures with accompanying commentary greatly enhance the presentation The third edition retains the successful blend of theory and practice that has made Sedgwick's work an invaluable resource for more than 400 000 programmers This particular book Parts 1-4 represents the essential first half of Sedgwick's complete work It provides extensive coverage of fundamental data structures and algorithms for sorting searching and related applications Although the substance of the book applies to programming in any language the implementations by Schidlowsky and Sedgwick also exploit the natural match between Java classes and abstract data type ADT implementations Highlights Java class implementations of more than 100 important practical algorithms Emphasis on ADTs modular programming and object oriented programming Extensive coverage of arrays linked lists trees and other fundamental data structures Thorough treatment of algorithms for sorting selection priority queue ADT implementations and symbol table ADT implementations search algorithms Complete implementations for binomial queues multiway radix sorting randomized BSTs splay trees skip lists multiway tries B trees extendible hashing and many other advanced methods Quantitative information about the algorithms that gives you a basis for comparing them More than 1 000 exercises and more than 250 detailed figures to help you learn properties of the algorithms Whether you are learning the algorithms for the first time or wish to have up to date reference material that incorporates new programming styles with classic and new algorithms you will find a wealth of useful information in this book
