Introduction to Healthcare Informatics Sue Biedermann, Diane Dolezel, 2017 **An Introduction to Healthcare Informatics** Peter Mccaffrey, 2020-07-29 An Introduction to Healthcare Informatics Building Data Driven Tools bridges the gap between the current healthcare IT landscape and cutting edge technologies in data science cloud infrastructure application development and even artificial intelligence Information technology encompasses several rapidly evolving areas however healthcare as a field suffers from a relatively archaic technology landscape and a lack of curriculum to effectively train its millions of practitioners in the skills they need to utilize data and related tools The book discusses topics such as data access data analysis big data current landscape and application architecture Additionally it encompasses a discussion on the future developments in the field This book provides physicians nurses and health scientists with the concepts and skills necessary to work with analysts and IT professionals and even perform analysis and application architecture themselves Presents case based learning relevant to healthcare bringing each concept accompanied by an example which becomes critical when explaining the function of SQL databases basic models etc Provides a roadmap for implementing modern technologies and design patterns in a healthcare setting helping the reader to understand both the archaic enterprise systems that often exist in hospitals as well as emerging tools and how they can be used together Explains healthcare specific stakeholders and the management of analytical projects within healthcare allowing healthcare practitioners to successfully navigate the political and bureaucratic challenges to implementation Brings diagrams for each example and technology describing how they operate individually as well as how they fit into a larger reference architecture built upon throughout the book [Introduction to Healthcare Informatics, 3e](#) Leming Zhou, Lesley Clack, 2023-03-14 **Introduction to Nursing Informatics** Kathryn J. Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons It does not attempt to compete with the primers already on the market Eminent international experts will edit author or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field Each book will be practical easy to use and well referenced Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes However integrated computing systems are only one tool for improving communication among members of the health care team Therefore it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship Our joint values put people first If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded [Health Informatics - E-Book](#) Lynda R. Learn how information technology intersects with today's health care *Health Informatics: An Interprofessional Approach* 3rd Edition follows the tradition of expert informatics educators Ramona Nelson and Nancy Staggers with new lead author Lynda R Hardy to prepare you for success in today's technology-filled healthcare practice. Concise coverage includes information systems and applications such as electronic health records, clinical decision support, telehealth, mHealth, ePatients, and social media tools, as well as system implementation. New to this edition are topics that include analytical approaches to health informatics, increased information on FHIR and SMART on FHIR, and the use of health informatics in pandemics. Chapters written by experts in the field provide the most current and accurate information on continually evolving subjects like evidence-based practice, EHRs, PHRs, mobile health, disaster recovery, and simulation. Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. Case studies and discussion questions at the end of each chapter encourage higher-level thinking that can be applied to real-world experiences. Conclusion and Future Directions discussion at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. Open-ended discussion questions at the end of each chapter enhance students' understanding of the subject covered. mHealth chapter discusses all relevant aspects of mobile health, including global growth, new opportunities in underserved areas, governmental regulations on issues such as data leaking and mining, implications of patient-generated data, legal aspects of provider monitoring of patient-generated data, and increased responsibility by patients. Important content including FDA and state-based regulations, project management, big data, and governance models prepares students for one of nursing's key specialty areas. UPDATED Chapters reflect the current and evolving practice of health informatics using real-life healthcare examples to show how informatics applies to a wide range of topics and issues. NEW Strategies to promote healthcare equality by freeing algorithms and decision-making from implicit and explicit bias are integrated where applicable. NEW The latest AACN domains are incorporated throughout to support BSN, Master's, and DNP programs. NEW Greater emphasis on the digital patient and the partnerships involved, including decision-making.
