architectures are moving towards greater levels of parallelism the most widely used programming languages such as C Java and Delphi are structured around a model of computation in which operations take place on a single value at a time This was appropriate when processors worked this way but has become an impediment to programmers seeking to make use of the performance offered by multi media instruction sets The introduction of SIMD instruction sets Peleg et al *The Stephen Cobb User's Guide to FileMaker* Stephen Cobb, Chey Romfo, 1991 Expert author Cobb has teamed with veteran computer user Romfo to provide a comprehensive course in tapping the power of Filemaker II the 1 bestselling database product for the Macintosh The authors worked directly with the software publisher on the book **Building and Managing E-Book**
