Air Dispersion Modeling Foundations And Applications:

Air Dispersion Modeling Alex De Visscher, 2013-09-26 A single reference to all aspects of contemporary air dispersion modeling The practice of air dispersion modeling has changed dramatically in recent years in large part due to new EPA regulations Current with the EPA s 40 CFR Part 51 this book serves as a complete reference to both the science and contemporary practice of air dispersion modeling Throughout the book author Alex De Visscher guides readers through complex calculations equation by equation helping them understand precisely how air dispersion models work including such popular models as the EPA s AERMOD and CALPUFF Air Dispersion Modeling begins with a primer that enables readers to quickly grasp basic principles by developing their own air dispersion model Next the book offers everything readers need to work with air dispersion models and accurately interpret their results including Full chapter dedicated to the meteorological basis of air dispersion Examples throughout the book illustrating how theory translates into practice Extensive discussions of Gaussian Lagrangian and Eulerian air dispersion modeling Detailed descriptions of the AERMOD and CALPUFF model formulations This book also includes access to a website with Microsoft Excel and MATLAB files that contain examples of air dispersion model calculations Readers can work with these examples to perform their own calculations With its comprehensive and up to date coverage Air Dispersion Modeling is recommended for environmental engineers and meteorologists who need to perform and evaluate environmental impact assessments The book s many examples and step by step instructions also make it ideal as a textbook for students in the fields of environmental engineering meteorology chemical engineering and environmental sciences

Global Perspectives on Air Pollution Prevention and Control System Design Venkatesan, G., Thirumal, Jaganthan, 2019-06-25 Once pollutants are released into the atmosphere they cannot be removed easily nor can the reaction with atmospheric constituents be ceased However through enhancing our understanding of control technology further addition of pollution can be forestalled Through better understanding of innovations in the field of air pollutant control technology and modelling better cost effective control equipment can be designed to achieve a clean biosphere for sustainable life in the near future Global Perspectives on Air Pollution Prevention and Control System Design is a pivotal reference source that provides vital research on the understanding of the basic concepts of air pollution modeling concepts development of various models for source specific pollutants and dispersion While highlighting topics such as climate change fossil fuels and motor vehicle emissions this publication explores the links between the global impact on climate change and modeling concepts of indoor air pollutants This book is ideally designed for professors students researchers environmental agencies environmentalists policymakers and government officials seeking current research on future solutions in critical fields of air pollution

Wind Energy Engineering Trevor Letcher, 2023-05-08 Wind Energy Engineering A Handbook for Onshore and Offshore Wind Turbines Second Edition continues to be the most advanced up to date and research focused text on all aspects of wind energy engineering Covering a wider spectrum of topics in the field of

wind turbines offshore and onshore this new edition includes new intelligent turbine designs and optimization current challenges and efficiencies remote sensing and smart monitoring and key areas of advancement such as floating wind turbines Each chapter includes a research overview with a detailed analysis and new case studies looking at how recent research developments can be applied Written by some of the most forward thinking professionals in the field and giving a complete examination of one of the most promising and efficient sources of renewable energy this book is an invaluable reference into this cross disciplinary field for engineers Offers an all around understanding of the links between worldwide resources including wind turbine technology electricity and environmental issues and economics Provide the very latest research and development in over 33 fields of endeavor related to wind power Includes extensive sets of references in each chapter giving readers all the very latest thinking and information on each topic

Bio-inspired Information and Communication Technologies Yifan Chen,Tadashi Nakano,Lin Lin,Mohammad Upal Mahfuz,Weisi Guo,2020-08-10 This book constitutes the refereed conference proceedings of the 12th International Conference on Bio inspired Information and Communications Technologies held in Shanghai China in July 2020 Due to the safety concerns and travel restrictions caused by COVID 19 BICT 2020 took place online in a live stream BICT 2020 aims to provide a world leading and multidisciplinary venue for researchers and practitioners in diverse disciplines that seek the understanding of key principles processes and mechanisms in biological systems and leverage those understandings to develop novel information and communications technologies ICT The 20 full and 8 short papers were carefully reviewed and selected from 56 submissions In addition to the main track targeting broad and mainstream research topics BICT 2020 includes four special tracks with focused research topics on internet of everything intelligent internet of things and network applications intelligent sensor network and data driven intelligent modeling application and optimization

Advances and New Trends in Environmental Informatics Volker Wohlgemuth,Stefan Naumann,Grit Behrens,Hans-Knud Arndt,2021-12-10 This book is an outcome of the 35th International Conference EnviroInfo 2021 held at Humboldt University Berlin organized by the technical committee for Environmental Informatics of the German Informatics Society It presents a selection of papers that describe innovative scientific approaches and ongoing research in environmental informatics and the emerging field of environmental sustainability promoted and facilitated by the use of information and communication technologies ICT The respective articles cover a broad range of scientific aspects including advances in core environmental informatics related technologies such as earth observation environmental modelling big data and machine learning robotics smart agriculture and food solutions renewable energy based solutions optimization of infrastructures sustainable industrial processes and citizen science as well as applications of ICT solutions intended to support societal transformation processes toward the more sustainable management of resource use transportation and energy supplies A special focus lies on the question how environmental informatics can contribute to achieving the United Nations Sustainable Development Goals Given its scope the book is essential reading for scientists

experts and students in these fields of research

Environmental Processes and Management Raj Mohan Singh, Prabhakar Shukla, Prachi Singh, 2020-02-17 This book presents an in depth science based approach to applying key project management and spatial tools and practices in environmental projects Providing important data for those considering projects that balance social economic growth against minimizing its ill effects on planet Earth the book discusses various aspects of environmental engineering as well as formula and analytical approaches required for more informed decision making Beginning with a broad overview of the factors and features of environmental processes and management the book then clearly details the general application of fundamental processes the characteristics of the different systems in which they occur and the way in which these factors influence process dynamics environmental systems and their possible remedies While primarily intended for professionals responsible for the management of environmental projects or interested in improving the overall efficiency of such projects it is also useful for managers in the private public and not for profit sectors Further it is a valuable resource for students at both undergraduate and postgraduate levels and an indispensable guide for anyone wanting to develop their skills in modern environmental management and related techniques
