Giddens's Concepts for Canadian Nursing Practice - E-Book Debra (Debbie) Sheppard-LeMoine, Lisa-Marie Forcier, 2025-11-21 Learn the core concepts of Canadian nursing care and how to apply them to the clinical setting. *Giddens's Concepts for Canadian Nursing Practice* uses a simplified intuitive approach to describe 64 important concepts relating to all areas of nursing practice in a Canadian health care context including Indigenous health, racism, and gender diversity. Integrating the latest Canadian statistics, research, and cultural considerations, this text emphasizes cultural safety, interprofessional collaboration, and health equity. To reinforce understanding, this book also makes connections among related concepts and links you to other Elsevier nursing textbooks. Exemplars for each concept provide useful examples and models showing how concepts are successfully applied to practice. Essential tools and case studies for clinical reasoning in nursing help you confidently prepare for almost any clinical nursing situation.

Lifespan Development in Context Tara L. Kuther, 2023-02-24 Award-winning author Tara Kuther presents *Lifespan Development in Context* Second Edition, a topically oriented edition of her bestselling text that provides a panoramic view of the many influences that shape human development. Kuther's student-friendly narrative illustrates how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change throughout our lives. Three core themes resonate throughout each chapter and across each developmental domain and topic: the centrality of context, the importance of research, and the applied value of developmental science. Foundational theories and classic studies are woven together with contemporary research and culturally diverse perspectives for a full, updated introduction to the field that is both comprehensive and concise. Case studies, real-world applications, and video examples ignite critical thinking and class discussion, ensuring students have the tools they need to apply course concepts to their lives and future careers.

Handbook on the Neuropsychology of Aging and Dementia Lisa D. Ravdin, Heather L. Katzen, 2012-09-14 With the aging of the baby boomers and medical advances that promote longevity, older adults are rapidly becoming the fastest growing segment of the population. As the population ages, so does the incidence of age-related disorders. Many predict that 15%–20% of the baby boomer generation will develop some form of cognitive decline over the course of their lifetime, with estimates escalating to up to 50% in those achieving advanced age. Although much attention has been directed at Alzheimer's disease, the most common form of dementia, it is estimated that nearly one-third of those cases of cognitive decline result from other neuropathological mechanisms. In fact, many patients diagnosed with Alzheimer's disease likely have comorbid disorders that can also influence cognition, i.e., vascular cognitive impairment, suggesting mixed dementias are grossly underdiagnosed. *The Clinical Handbook on the Neuropsychology of Aging and Dementia* is a unique work that provides clinicians with expert

guidance and a hands on approach to neuropsychological practice with older adults The book will be divided into two sections the first addressing special considerations for the evaluation of older adults and the second half focusing on common referral questions likely to be encountered when working with this age group The authors of the chapters are experts and are recognized by their peers as opinion leaders in their chosen chapter topics The field of neuropsychology has played a critical role in developing methods for early identification of late life cognitive disorders as well as the differential diagnosis of dementia Neuropsychological assessment provides valuable clinical information regarding the nature and severity of cognitive symptoms associated with dementia Each chapter will reinforce the notion that neuropsychological measures provide the clinician with sensitive tools to differentiate normal age related cognitive decline from disease associated impairment aid in differential diagnosis of cognitive dysfunction in older adults as well as identify cognitive deficits most likely to translate into functional impairments in everyday life
