Strictness Analysis of Lazy Functional Programs Peter N. Benton,1993 We also consider extending the logic with disjunction We then describe how to extend the simply typed lambda calculus with lazy algebraic datatypes A new construction of lattices of strictness properties of such datatypes is described This arises from the characterisation of the solutions to the recursive domain equations associated with these types as initial algebras Next we consider first order ML style polymorphism and show how Wadler s theorems for free parametricity results may be obtained from a simple extension of the semantics of the monomorphic language We then prove a polymorphic invariance result relating the derivable strictness properties of different substitution instances of polymorphic terms *1982 European Conference on Artificial Intelligence* ,1982 **ECAI-82** ,1982 **Dissertation Abstracts International** ,1995
