Introduction

Developmental psychology is a significant study of human development, including cognitive, physical, perceptual, intellectual, social, emotional growth, and personality. Moreover, **psychosocial development** is based on a person's individual needs, followed by social needs. Psychosocial development encompasses all of life, from the moment of birth until death. The theory of psychosocial development was developed by the well-known psychologist Erik Erikson. Insight and depth

In the first case study, the depth and insights are based on the life experiences of David. Currently, he is facing three psychosocial issues, namely- **substance abuse, anxiety, and depression**, as identified clearly from the evidence.

A second Case study is about a 26-year-old lady having **violence, anger & depression**.

Case study 1 background: David has just completed his graduation and is on the verge of making his prospects. However, due to familial issues and peer pressure, he engaged himself in aspects of **substance abuse** and **depression**. David had a troubled childhood due to occasional fights and conflicting issues among his parents that later in his life provoked him to engage in excessive alcohol consumption, drugs, cigarettes, and immoral activities. Obviously, he had been a victim & has witnessed his mother getting victimized by his father's physical abuse, including kicking, hitting, and locking
