Kenneth Seidelmann, Catherine Y. Hohenkerk, 2020-06-29 This edited volume charts the history of celestial navigation over the course of five centuries. Written by a group of historians and scientists, it analyzes how competing navigation systems, technologies, and institutions emerged and developed, with a focus on the major players in the US and the UK. The history covers the founding of the Royal Observatory, the first printing of a Nautical Almanac, the founding of the US and UK Nautical Almanac Offices, the creation of international standards for reference systems and astronomical constants, and the impact of 20th-century technology on the field, among other topics. Additionally, the volume analyzes the present role and status of celestial navigation, particularly with respect to modern radio and satellite navigation systems. With its diverse authorship and nontechnical language, this book will appeal to any reader interested in the history of science, technology, astronomy, and navigation over the ages.

Williams, 2025-10-17 Stepping Stones to Christianity introduces a rational case for Christianity in three steps, starting with scientific arguments for design in cosmology and biology, moving on to philosophical arguments for the existence of God, and closing with an overview of the evidence for a Christian understanding of the historical Jesus in the context of competing contemporary worldviews. By bringing together revised and expanded versions of materials written to introduce three of the author's Essays on Books with Wipf Stock, Stepping Stones to Christianity equips readers to consider the case for design in nature, to investigate philosophical arguments for God, and to wrestle with the identity of Jesus.
