The Software Craftsman Sandro Mancuso, 2014-12-12 Be a Better Developer and Deliver Better Code Despite advanced tools and methodologies software projects continue to fail Why Too many organizations still view software development as just another production line Too many developers feel that way too and they behave accordingly In *The Software Craftsman* Professionalism Pragmatism Pride Sandro Mancuso offers a better and more fulfilling path If you want to develop software with pride and professionalism love what you do and do it with excellence and build a career with autonomy mastery and purpose it starts with the recognition that you are a craftsman Once you embrace this powerful mindset you can achieve unprecedented levels of technical excellence and customer satisfaction Mancuso helped found the world's largest organization of software craftsmen now he shares what he's learned through inspiring examples and

pragmatic advice you can use in your company your projects and your career You will learn Why agile processes aren't enough and why craftsmanship is crucial to making them work How craftsmanship helps you build software right and helps clients in ways that go beyond code How and when to say No and how to provide creative alternatives when you do Why bad code happens to good developers and how to stop creating and justifying it How to make working with legacy code less painful and more productive How to be pragmatic not dogmatic about your practices and tools How to lead software craftsmen and attract them to your organization What to avoid when advertising positions interviewing candidates and hiring developers How developers and their managers can create a true culture of learning How to drive true technical change and overcome deep patterns of skepticism Sandro Mancuso has coded for startups software houses product companies international consultancies and investment banks In October 2013 he cofounded Codurance a consultancy based on Software Craftsmanship principles and values His involvement with Software Craftsmanship began in 2010 when he founded the London Software Craftsmanship Community LSCC now the world's largest and most active Software Craftsmanship community with more than two thousand craftsmen For the past four years he has inspired and helped developers to organize Software Craftsmanship communities throughout Europe the United States and the rest of the world [Living Documentation](#) Cyrille Martraire,2019-05-25 Use an Approach Inspired by Domain Driven Design to Build Documentation That Evolves to Maximize Value Throughout Your Development Lifecycle Software documentation can come to life stay dynamic and actually help you build better software Writing for developers coding architects and other software professionals Living Documentation shows how to create documentation that evolves throughout your entire design and development lifecycle Through patterns clarifying illustrations and concrete examples Cyrille Martraire demonstrates how to use well-crafted artifacts and automation to dramatically improve the value of documentation at minimal extra cost Whatever your domain language or technologies you don't have to choose between working software and comprehensive high-quality documentation you can have both Extract and augment available knowledge and make it useful through living curation Automate the creation of documentation and diagrams that evolve as knowledge changes Use development tools to refactor documentation Leverage documentation to improve software designs Introduce living documentation to new and legacy environments [From Code to Computation](#) Set Lonnert,2026-01-01 If you've written code and wrestled with algorithms you know the satisfaction of making a machine do exactly what you tell it But something fundamental is shifting in how we work with computers and the best way to understand that shift is to build your way through it This book explores computation's evolution from predictable algorithms to adaptive systems through hands-on projects that demand both technical skill and conceptual understanding You won't just read about virtual machines or language models You'll implement them experiment with them and develop intuition about when each approach makes sense Each project builds on the last creating a learning journey from mechanical precision to fluid reasoning The project-based approach means you'll

spend more time building than reading more time experimenting than memorizing You ll encounter challenges that require creative problem solving debug systems that behave in unexpected ways and gradually develop the kind of judgment that only comes from direct engagement with computational systems The book assumes working knowledge of Python and C at an intermediate level along with familiarity with basic computer science concepts but the real prerequisite is willingness to learn through making If you re ready to expand beyond writing code to reasoning about systems and to do so by building rather than just studying this book is your guide Technologies of Labour and the Politics of Contradiction Paško Bilić, Jaka Primorac, Bjarki Valtýsson, 2018-05-07 This book is situated in the nexus between technology labour and politics It focuses on contradictions as heuristic devices that uncover struggles frictions and ambiguities of digitalization in work and labour environments Topics include contradictions in automation internet platforms digital practices creative industries communication industries human interaction democratic participation and regulation Three cross cutting themes can be identified within the diverse chapters represented in the book First many authors argue that labour and economic valorisation occur outside of the traditional concept of working space and time Second digital technology is not fixed under capital It is malleable and mouldable Third many political tensions are occurring without organized awareness or dissent The book will therefore be of interest to researchers and students in the fields of sociology of work media studies cultural studies gender studies science and technology studies and Critical Theory as well as to trade unionists and policy makers
