Creative Thinking and Arts-based Learning Joan P. Isenberg, Mary Renck Jalongo, 2006 Creative Thinking and Arts Based Learning prepares preservice and inservice teachers to know why children's creative thinking and play are so important, know about children's play and creative thinking, and also know how to provide these experiences within the curriculum. It contains extensive coverage of the roles, responsibilities, and strategies that lead to a more child-centered, play-based curriculum. An Applied Approach: Many instructional guidelines and classroom strategies are presented throughout the text for integrating creative thinking and play into learning. Cases about preschoolers, K-2nd graders, and 3rd-4th graders open each chapter and show readers how teachers infuse the arts into learning. Meeting Standards: This new feature discusses how to provide for creativity in classrooms while also meeting state and national standards. Frequently Asked Questions: Another new feature poses common questions about issues such as what materials and resources to use, how to adapt environments for diverse learners, and how to foster and assess creative thought. Misconceptions are dispelled with research-based answers. A Theoretical Approach: Solid theory underlies all of the content. The authors' experience as university professors and practitioners is evident in their clear presentation of relevant theory. A Reflective Approach: Teachers' Reflections in each chapter tell readers what other preservice and inservice teachers are thinking and doing in their classrooms relative to their experiences with the arts. Resources: Instructor's Manual and test bank, PowerPoint Slides.

Introduction to Early Childhood Education Marian Marion, 2010 Armed with the mantra "knowledge before action," this introduction to early childhood education allows teachers to first understand the development of the whole child and then to plan an environment and curriculum that will allow them to learn and thrive. Using a largely developmental approach, this first edition text explores both time-honored theories of early childhood development and current models and modern research in the field. Part One of the text discusses the history and theories of childhood development, while Part Two instructs teachers how to support children's emotional, social, cognitive, and physical development. The final section of the book explains how to assess and guide to support children and how to implement developmentally appropriate curriculum in the classroom. This text is supplemented with a number of features and ancillaries that make learning easier for students and teaching easier for instructors. Students will benefit from the many boxed activities and aides, as well as by the online features contained in MyEducationLab. Teachers may take advantage of the online instructors' guide, online test bank, numerous videos, and PowerPoint slides.
