

would be 80, meaning that 80 percent of scores on the exam were at or below 75.

Calculating the percentile rank of a score of 75. This point is illustrated in Figure 5:2

Figure 5:2  
PERCENTILE RANK FOR SCORE OF 75

If the data are properly organized and the appropriate formulas carefully followed, the sequential statistical steps for finding percentiles and percentile ranks are not difficult. Researchers working with percentiles begin with the desired percentage which is used to calculate the specific value that represents the appropriate dividing point within the distribution. Researchers working with percentile ranks begin with a specific score or value and calculate the percentage of cases falling at or below it. Even though it will be unclear at this point as to how the formula for finding percentiles is actually used, the formula is given here and it will be explained momentarily exactly how it will be used. The formula for percentiles is as follows:
