second volume Metals in Biology Applications of High Resolution EPR to Metalloenzymes will appear later this year covering the complement of other metalloproteins One of the pioneers in the development of pulsed EPR and its application to metalloproteins was Arthur Schweiger whose contribution we include in this volume Unfortunately he passed away suddenly during the preparation of this volume The editors and coauthors are extremely honored to dedicate this volume to the memory of Arthur Schweiger in recognition of his technical advances and insights into pulsed EPR and its application to metalloproteins Arthur was extremely humble and treated everyone with equal respect He was a gifted educator with an ability to explain complex phenomena in terms of simple intuitive pictures had a delightful personality and continues to be sadly missed by the community It is an honor for the editors to facilitate the dissemination of these excellent contributions to the scientific community Suggestions for future volumes are always appreciated Industrial and Engineering Chemistry
