Development and Characterization of Bifacial P-type Silicon Shingle Solar Cells with Edge Passivation Puzant Baliozian,2023 Modelling and Optimization of Photovoltaic Cells, Modules, and Systems Carlos David Rodríguez Gallegos,2021-04-28

This book presents a study to determine the current limitations in the area of Photovoltaics PV as a source of renewable energy and proposes strategies to overcome them by applying optimization approaches in three main areas namely related to photovoltaic solar cells modules and systems These include grid metallization design of Si based solar cells and modules cost effectiveness analysis between Si based monofacial and bifacial grid connected PV systems optimal diesel replacement strategy for the progressive introduction of PV and batteries dispatch strategy optimization for PV hybrid systems in real time The novelty of the work presented in this book is of high interest to the scientific community but also to the PV manufacturers installation companies and investors Development and Characterization of Bifacial

Amorphous Silicon Solar Cells with Graded Low-level Doped I-layers characterised by Bifacial Measurements , Bifacial spectral response characterization of solar cells under near operating condition illumination is used in conjuncture with a novel bifacial DICE analysis to establish the collection efficiency as a function of i layer position in p i n amorphous silicon solar cells A significant portion of solar cell degradation can be explained in terms of electric field distortions which increase recombination losses Unlike carrier lifetime reductions the field distortions can be reduced The numerical model is used to guide the intentional doping of the i layer to counteract the field distortions caused by charged dangling bonds and thus to optimize the electric field for the degraded state Solar cells with graded low level boron doping in the i layer are analysed in detail Increasing conversion efficiency during light soaking and enhanced stabilized n side performance show the
