John Bellamy Foster

Ecology Against Capitalism:

Ecology Against Capitalism John Bellamy Foster, 2002-02 In recent years John Bellamy Foster has emerged as a leading theorist of the Marxist perspective on ecology His seminal book *Marx's Ecology* Monthly Review Press 2000 discusses the place of ecological issues within the intellectual history of Marxism and on the philosophical foundations of a Marxist ecology and has become a major point of reference in ecological debates This historical and philosophical focus is now supplemented by more directly political engagement in his new book *Ecology against Capitalism* In a broad ranging treatment of contemporary ecological politics Foster deals with such issues as pollution sustainable development technological responses to environmental crisis population growth soil fertility the preservation of ancient forests and the new economy of the Internet age Foster's introduction sets out the unifying themes of these essays enabling the reader to draw from them a consolidated approach to a rapidly expanding field of debate which is of critical importance in our times Within these debates on the politics of ecology Foster's work develops an important and distinctive perspective Where many of these debates assume a basic divergence of red and green issues and are concerned with the exact terms of a trade off between them Foster argues that Marxism properly understood already provides the framework within which ecological questions are best approached This perspective is advanced here in accessible and concrete form taking account of the major positions in contemporary ecological debate

Ecology Against Capitalism John Bellamy Foster, 2002 *The Ecological Revolution* John Bellamy Foster, 2009-02-01 Since the atomic bomb made its first appearance on the world stage in 1945 it has been clear that we possess the power to destroy our own planet What nuclear weapons made possible global environmental crisis marked especially by global warming has now made inevitable if business as usual continues The roots of the present ecological crisis John Bellamy Foster argues in *The Ecological Revolution* lie in capital's rapacious expansion which has now achieved unprecedented heights of irrationality across the globe Foster compellingly demonstrates that the only possible answer for humanity is an ecological revolution a struggle to make peace with the planet Foster details the beginnings of such a revolution in human relations with the environment which can now be found throughout the globe especially in the periphery of the world system where the most ambitious experiments are taking place This bold new work addresses the central issues of the present crisis global warming peak oil species extinction world water shortages global hunger alternative energy sources sustainable development and environmental justice Foster draws on a unique range of thinkers including Karl Marx Thomas Malthus William Morris Albert Einstein Hannah Arendt Rachel Carson Vandana Shiva and István Mészáros The result is a startlingly radical synthesis which offers new hope for grappling with the greatest challenge of our age what must be done to save the earth for humanity and all living species

The Ecological Crisis and the Logic of Capital Xueming Chen, 2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective *The Ecological Crisis and*

the Logic of Capital explores the logic of capitalism as a fundamental cause of today's environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism

The Return of Nature John Bellamy Foster, 2020-06-16 A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's Marx's Ecology Materialism and Nature introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of efforts to unite issues of social justice and environmental sustainability that will help us comprehend and counter today's unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs

Ecology and Socialism Chris Williams, 2010-08-17 Around the world consciousness of the threat to our environment is growing The majority of solutions on offer from using efficient light bulbs to biking to work focus on individual lifestyle changes yet the scale of the crisis requires far deeper adjustments Ecology and Socialism argues that time still remains to save humanity and the planet but only by building social movements for environmental justice that can demand qualitative changes in our economy workplaces and infrastructure Chris Williams is a longtime environmental activist professor of physics and chemistry at Pace University and chair of the science department at Packer Collegiate Institute He lives in New York City

Capitalism Versus Planet Earth Fawzi Ibrahim, 2012-06-14 The dangerous intersection between ecological and economic crisis leaving humanity with a stark choice maintain capitalism or save the planet

The Ecological Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In The Ecological Rift Capitalism's War

on the Earth environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development Globalization and the Environment,2006-06-01 What is missing in the mounting literature on globalization is a focused theoretical foundation with parallel empirical examinations of global structures and their environmental consequences The articles in this volume examine how the world economy and related non economic forms of global structuring impact the natural environment and the living conditions of human populations living across the globe Environmental dynamics in areas as diverse as Ancient Egypt and the Modern Amazon are presented for readers who are new to the world systems approach and for others interested in recent efforts to link environmental outcomes and antecedents to global processes Marx's Ecology John Bellamy Foster,2000-03-01 Progress requires the conquest of nature Or does it This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis Marx it is often assumed cared only about industrial growth and the development of economic forces John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology philosophical naturalism and evolutionary theory He shows that Marx known as a powerful critic of capitalist society was also deeply concerned with the changing human relationship to nature Marx's Ecology covers many other thinkers including Epicurus Charles Darwin Thomas Malthus Ludwig Feuerbach P J Proudhon and William Paley By reconstructing a materialist conception of nature and society Marx's Ecology challenges the spiritualism prevalent in the modern Green movement pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis *The Vulnerable Planet* John Bellamy Foster,1999-09 Rejecting both individualistic solutions and policies that tinker at the margins John Bellamy Foster calls for a fundamental reorganization of production on a social basis so as to make possible a sustainable and ecological economy This revised edition includes a new afterword by the author BOOK JACKET **Alternatives Journal** ,2004 *Globalization and the Environment* Andrew Jorgenson,Edward Lee Kick,2006 The articles in this volume examine how the world economy and related non economic forms of global structuring have impacted the natural environment and the living conditions of human

populations across the globe in areas as diverse as Ancient Egypt and the modern Amazon *Faltering Economy* John Bellamy Foster, 1984 The essays in this volume by veteran economists as well as younger scholars are part of a radical attempt to grapple with the problems of advanced capitalist development without discarding the real theoretical breakthroughs made by Keynes The contributors argue that Keynes was correct in pointing to the economic contradictions stemming from unemployment income inequality and speculative finance but failed to consider the class composition of social output the macroeconomic effects of the modern firm and the atrophy of investment under conditions of capitalist maturity They thus seek to uncover the sources of stagnation under monopoly capitalism by building on the work of three of the great economists of modern times Marx Keynes and Kalecki *Social Science Probing*, 2007 **Hope Against Hope** Out Of Collective, Out of the Woods, 2020-03-15 Climate disaster is here Capitalism can't fix it not even with a Green New Deal Our only hope against hope is disaster communism *Sociological Abstracts* Leo P. Chall, 2003 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers [Coming to Terms with Nature](#) Leo Panitch, Colin Leys, 2006 Can capitalism come to terms with the environment How do market forces impact on the biosphere What is the significance of the impasse over the Kyoto protocol How far has socialist thought developed to help us understand the environmental dilemma Has it got answers **Globalization, Inequality, and the Commodification of Life and Well-being** Mammo Muchie, Li Xing, 2006 Wealth and money which are meant to be sources of human happiness and facilitators of good social relations has instead become a monstrosity beyond human control The unbridled quest to make money and accumulate wealth as well as assign social signification on the basis of the outcome of individuals efforts in the process has ended up distorting existence and the meaning of being human itself This work brings together a collection of very provocative and challenging articles that confront the problems created by wealth Can there be happiness when wealth is increasingly concentrated in fewer and fewer hands Can wealth really bring happiness And what are the implications of the current trend to commodify everything for the project of human happiness The contributors to the volume argue that there is a need to change wealth accumulation and its core purpose They contend that from wealth accumulation the gear must change to wealth alleviation because the ways the rich become wealthy often correlate with the ways the number of the poor increase Following from this they argue that rather than the current focus on poverty alleviation the focus should shift to wealth alleviation because a happy future for all lies in promoting human well being and removing human ill being through the spring wells of solidarity and humanity *The Ecological Revolution* John Bellamy Foster, 2009-02 The roots of the present ecological crisis Foster argues lie in capital's rapacious expansion which has now achieved unprecedented heights of irrationality across the globe Foster demonstrates that the only possible answer for humanity is an ecological revolution a

struggle to make peace with the planet Foster details the beginnings of such a revolution in human relations with the environment which can now be found throughout the globe especially in the periphery of the world system where the most ambitious experiments are taking place From publisher description
