Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korqu Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written

record of the work that was presented to fellow conference delegates

Methodology

The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data. On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology.

Contribution made to scholarship

The articles come from individual researchers and each article in the proceedings is unique. Mostly there is no general argument leading from one contribution to the next. However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness.

Target audience

The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

Sustainable Building Through The Project Planning Process: The Case of Malaysia

Nor Kalsum Mohd Isa, Anuar Alias, Zulkiflee Abdul Samad, 2017-07-07

This book covers the concept of sustainable development, sustainable building development and the planning process of a sustainable building project. It offers expert insight into tackling sustainable building projects specifically during the planning process of the project from the conceptual to design stage to bring together project team members in developing sustainable buildings within the time and budget. This book includes case studies of a number of sustainable building projects in Malaysia. It also features interviews with the sustainable projects key stakeholders as a way to reveal the sustainable project planning process including the impact of the process towards project success. It also discusses the issues, barriers and suggested

relevant strategies to integrated sustainability principles into the project planning process This book is the most complete overview of sustainable building projects development in Malaysia that every member of the building project stakeholders will find invaluable

Contemporary Models for Pro-Poor Housing in Urban Sub-Saharan Africa Lovemore Chipungu, Hangwelani Hope Magidimisha-Chipungu, Joseph Kamuzhanje, 2026-01-13 The proportion of the world's urban population is expected to increase to about 57% by 2050 and the share of Africa's urban population is project to increase to 60% by the same year As a result of this phenomenal growth in urban population urbanization and urban poverty have begun to dominate the development discourse again after years of focusing on rural development Housing is a crucial issue for the urban poor who often lack land to build their own houses or access to financing that would allow them to purchase or build homes and are frequently concentrated in informal settlements with insufficient access to infrastructure health and education services Furthermore housing provision has largely fallen to central governments and policy has largely overlooked the capacity of the urban poor as individuals and communities to provide housing for themselves This book engages these challenges and assumptions offering insight into political economic environmental and financial frameworks that can help facilitate adequate housing options Drawing on examples from case studies across sub-Saharan Africa these contributions center the urban poor in initiatives to develop housing infrastructure offering lessons for researchers and governments looking to address an ever escalating housing crisis
