Tomkins, 1981-05-12 From the Publisher Kenan Malik shows that race is not a biological reality but also why it is so useful in scientific and medical research He claims that it is not through scientific research into human differences but through our obsession with identity and diversity that dangerous ideas about race are once more catching fire Blaming the preservation of racial ideas on the liberal antiracist movement with its emphasis on human difference over human commonalities Malik shows how antiracists have in recent years become increasingly hostile to both scientific ideas and freedom of thought Blending politics history science and philosophy Malik explores the science of skull measurement and the politics of the Holocaust diabetes rates among Hispanics and the fate of the Elgin Marbles the genetics of altruism and the struggle for Aboriginal rights the successes of Human Genome Project and the failures of multiculturalism Confronting issues such as the link between race and intelligence the promotion of race specific drugs the fashion for genealogy and why scientific research into controversial areas should not be constrained Malik proves that the debate about race is back and shows us how to deal with it
