Ufo Experience Budd Hopkins:

Missing Time Budd Hopkins,2021-04-20 Originally published in 1981 this pioneering work by Budd Hopkins was the first focused study of an enigma that would come to captivate the world and challenge our understanding of the universe The influence of Missing Time was such that its title is now deeply embedded into the lexicon of UFO studies synonymous with that most controversial and troubling of topics alien abduction At the time of its writing Hopkins could not have predicted the impact of Missing Time not only within UFOlogy but in popular culture worldwide The facts stories and theories presented herein laid the foundation for the first mainstream debates surrounding reports of human encounters with small grey skinned entities non human beings with hypnotic black eyes who came silently in the night for their own mysterious purposes These vivid descriptions as documented by Hopkins would trigger buried memories worldwide in people from all walks of life to the extent that the so called Greys now represent the dominant cultural imagining of an alien lifeform Missing Time is a comparative study of individuals distinct from one another in their life circumstances separated by geography but connected by their shared experience of a disturbing mystery with profound implications An essential addition to the library of any serious scholar of the anomalous and of all who dare to explore the physical psychological and spiritual extremities of human experience

UFOs and Abductions David Michael Jacobs,2000 Examining the nature of UFO evidence the authors present a primer for scholars skeptics and others uneasy about investigating the field of UFOs The volume also brings together three bestselling authors David M Jacobs Budd Hopkins and Pulitzer Prize winner John Mack widely known for their writings on the controversial alien abduction phenomenon

The Alien Abduction Phenomenon Paul Meehan,2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena

Alien Worlds Diana Tumminia,2022-09-01 This intriguing collection of essays presents reflections upon the birth proliferation enduring appeal and future of extraterrestrial mythology Highly respected authors and researchers representing the varied and sometimes competing perspectives of ufology and the sociology of religion provide a fascinating and instructive voyage into the social worlds of UFOs abductees and contactees Reports of aliens and the changing nature of abduction experience even its sexual dimension are explored in relation to literature cultural practices and ideology The influence of abduction therapy and support groups is considered as are new religious movements with extraterrestrial themes *Alien Worlds* will enlighten anyone wanting to understand what and how the academic world thinks about UFOs contactee groups and alien phenomena

Alien Chic Neil Badmington,2004-08-13 *Alien Chic* provides a cultural history of the alien since the 1950s asking ourselves why our attitudes to aliens have shifted from fear to affection and what this can tell us about how we now see ourselves and others Neil

Badmington explores our relationship with aliens inscribed in films such as *The War of the Worlds*, *Mars Attacks*, *Mission to Mars* and *Independence Day* and how thinkers such as Descartes, Barthes, Freud, Lyotard and Derrida have conceptualised what it means to be human and post human. *Alien Chic* examines the the concept of posthumanism in an age when the lines between what is human and what is non human are increasingly blurred by advances in science and technology for example genetic cloning and engineering and the development of AI and cyborgs. Questioning whether our current embracing of all things alien in the form of extraterrestrial gadgets or abduction narratives for instance stems from a desire to reaffirm ourselves as human this is an original and thought provoking contribution to the study of posthumanism.

Missing Time Budd Hopkins, 1988 The arrival of extraterrestrial visitors is one of the most momentous events of our time. In *Intruders* Budd Hopkins explored the shocking truth about the contact between earthling and alien that human beings are temporarily abducted and taken aboard UFOs. But Hopkins could not have told the stories of those victims without first having discovered the one experience common to all who report alien encounters the phenomenon known as missing time. Missing time tells how the people who have experienced abductions retained no memory of them all traces of the trauma were effectively erased from their memory. Yet under hypnosis many abductees were able to recall in vivid convincing detail the harrowing experiments that left mysterious scars on their bodies the eerie interiors of UFOs where they were held captive and the astonishing faces of their alien hosts. The stories of seven victims of these otherworldly intruders are told here in detail at once dispassionate and dramatic fully supported by scientific documentation. They are stories that could belong to anyone your neighbors your loved ones even you.

Science Meets the UFO Enigma Desmond Bragg, Paul Joslin, 2000 Thousands of well documented reports of strange and baffling events without known causes grouped under the amorphous heading UFOs are sufficient in the authors view to suggest that they merit serious scientific study. It is their opinion that a scientific study seriously undertaken would reveal cause effect relationship for some possibly all of the phenomena that constitute the UFO enigma. The accumulated evidence for the UFO enigma consists of reports from many parts of the world. These reports contain at least nineteen categories of human experiences ranging from simple observations of strange lights to accounts of abductions by strange unknown beings. Most reports are from ordinary persons unable to identify a natural cause for what they have observed or experienced. Many of these are sufficiently well documented to form the basis for scientific studies. The core of the UFO enigma is found in the thousands of challenging reports from highly intelligent knowledgeable persons with sufficient scientific expertise and experience to enable them to make clear distinctions between events with and without known causes. These latter reports form the basis of this book's assertion that the UFO enigma can and should be studied scientifically. This book is the authors attempt to provide an overview of the UFO enigma as a scientific problem and to suggest sources of information and methods for attempting to solve it.

UFO Abductions Neal Bernard, 1995 This book discusses the incidents of people abductees claiming to have been taken aboard UFOs.
