man's oldest occupation. For thousands of years he has tilled the soil and bred livestock to feed and clothe himself. Agriculture remains of great economic importance today. With the application of modern technology to crop production and stock rearing, however, the many health problems which are inseparable from work in the fields and on the farm generally have become more numerous and often more serious. Consequently the risks to which the agricultural worker is nowadays exposed are many and varied. This guide completes the triad of ILO publications intended for the protection of the agricultural worker from occupational accidents and diseases.
