**The Routledge Handbook of Second Language Acquisition and Individual Differences** Shaofeng Li, Phil Hiver, Mostafa Papi, 2022-05-30. The Routledge Handbook of Second Language Acquisition and Individual Differences provides a thorough in depth discussion of the theory, research, and pedagogy pertaining to the role individual difference (ID) factors play in second language acquisition (SLA). It goes beyond the traditional repertoire and includes 32 chapters covering a full spectrum of topics on learners' cognitive, conative, affective, and demographic/sociocultural variation. The volume examines IDs from two perspectives: one is how each ID variable is associated with learning behaviors, processes, and outcomes; the other is how each domain of SLA, such as vocabulary or reading, is affected by clusters of ID variables. The volume also includes a section on the common methods used in ID research, including data elicitation instruments such as surveys, interviews, and psychometric testing, as well as methods of data analysis such as structural equation modeling. The book is a must read for any second language researcher or applied linguist interested in investigating the effects of IDs on language learning, and for any educator interested in taking account of learners' individual differences to maximize the effects of second language instruction.

[The Psychology of Asian Learners](#) Ronnel B. King, Allan B. I. Bernardo, 2015-10-12. This book celebrates the scholarly achievements of Prof. David A. Watkins, who has pioneered research on the psychology of Asian learners, and helps readers grasp the cognitive, motivational, developmental, and socio-cultural aspects of Asian learners' learning experiences. A wide range of empirical and review papers which examine the characteristics of these experiences as

they are shaped by both the particularities of diverse educational systems cultural milieus and universal principles of human learning and development are showcased The individual chapters which explore learners from fourteen Asian countries autonomous regions and or economies build on research themes and approaches from Prof Watkins research work and are proof of the broad importance and enduring relevance of his seminal psychological research on learners and the learning process
