n restringiendo la parte de programación a la optimización clásica por razones docentes que por excelencia se utilizan en las ciencias económicas y empresariales para estudiar cuestiones de interés notable. Estos instrumentos resultan útiles ya que para el economista más importante que las cifras que muestran los indicadores económicos PIB, bienestar social, nivel de población y paro, consumo, comercio es analizar cómo evolucionan y hacer estimaciones de estos cambios de cara al futuro. Ya Herclito de Efeso 544-484 a.C. estaba convencido de que la frase que mueve el mundo es: Todo cambia, nada permanece. Así algunos objetivos de las ciencias económicas son el estudio de las relaciones entre las variables de los cambios que se producen en estas por influencias mutuas e indirectas y la búsqueda de mecanismos que garanticen el uso eficiente de los escasos recursos naturales y económicos de los que disponemos.
