Im-World Civilizations Philip J. Adler, 2002-06 **Picturing the Uncertain World** Howard Wainer, 2021-06-08 In his entertaining and informative book *Graphic Discovery* Howard Wainer unlocked the power of graphical display to make complex problems clear Now he's back with *Picturing the Uncertain World* a book that explores how graphs can serve as maps to guide us when the information we have is ambiguous or incomplete Using a visually diverse sampling of graphical display from heartrending autobiographical displays of genocide in the Kovno ghetto to the Pie Chart of Mystery in a New Yorker cartoon Wainer illustrates the many ways graphs can be used and misused as we try to make sense of an uncertain world *Picturing the Uncertain World* takes readers on an extraordinary graphical adventure revealing how the visual communication of data offers answers to vexing questions yet also highlights the measure of uncertainty in almost everything we do Are cancer rates higher or lower in rural communities How can you know how much money to sock away for retirement when you don't know when you'll die And where exactly did nineteenth century novelists get their ideas These are some of the fascinating questions Wainer invites readers to consider Along the way he traces the origins and development of graphical display from William Playfair who pioneered the use of graphs in the eighteenth century to instances today where the public has been misled through poorly designed graphs We live in a world full of uncertainty yet it is within our grasp to take its measure Read *Picturing the Uncertain World* and learn how

In Schools We Trust Deborah Meier, 2014-02-18 We are in an era of radical distrust of public education Increasingly we turn to standardized tests and standardized curricula now adopted by all fifty states as our national surrogates for trust Legendary school founder and reformer Deborah Meier believes fiercely that schools have to win our faith by showing they can do their job But she argues just as fiercely that standardized testing is precisely the wrong way to that end The tests themselves she argues cannot give the results they claim And in the meantime they undermine the kind of education we actually want In this multilayered exploration of trust and schools Meier critiques the ideology of testing and puts forward a different vision forged in the success stories of small public schools she and her colleagues have created in Boston and New York These nationally acclaimed schools are built famously around trusting teachers and students and parents to use their own judgment Meier traces the enormous educational value of trust the crucial and complicated trust between parents and teachers how teachers need to become better judges of each others work how race and class complicate trust at all levels and how we can begin to scale up from the

kinds of successes she has created

Origins of Moral-political Philosophy in Early China Tao Jiang,2021 This book rewrites the story of classical Chinese philosophy which has always been considered the single most creative and vibrant chapter in the history of Chinese philosophy Works attributed to Confucius Mozi Mencius Laozi Zhuangzi Xunzi Han Feizi and many others represent the very origins of moral and political thinking in China As testimony to their enduring stature in recent decades many Chinese intellectuals and even leading politicians have turned to those classics especially Confucian texts for alternative or complementary sources of moral authority and political legitimacy Therefore philosophical inquiries into core normative values embedded in those classical texts are crucial to the ongoing scholarly discussion about China as China turns more culturally inward It can also contribute to the spirited contemporary debate about the nature of philosophical reasoning especially in the non Western traditions This book offers a new narrative and interpretative framework about the origins of moral political philosophy that tracks how the three normative values humaneness justice and personal freedom were formulated reformulated and contested by early Chinese philosophers in their effort to negotiate the relationship among three distinct domains the personal the familial and the political Such efforts took place as those thinkers were reimagining a new moral political order debating its guiding norms and exploring possible sources within the context of an evolving understanding of Heaven and its relationship with the humans Tao Jiang argues that the competing visions in that debate can be characterized as a contestation between partialist humaneness and impartialist justice as the guiding norm for the newly imagined moral political order with the Confucians the Mohists the Laoists and the so called fajia thinkers being the major participants constituting the mainstream philosophical project during this period Thinkers lined up differently along the justice humaneness spectrum with earlier ones maintaining some continuity between the two normative values or at least trying to accommodate both to some extent while later ones leaning more toward their exclusivity in the political public domain Zhuangzi and the Zhuangists were the outliers of the mainstream moral political debate who rejected the very parameter of humaneness versus justice in that discourse They were a lone voice advocating personal freedom but the Zhuangist expressions of freedom were self restricted to the margins of the political world and the interiority of one s heartmind Such a take can shed new light on how the Zhuangist approach to personal freedom would profoundly impact the development of this idea in pre modern Chinese political and intellectual history
