Arabnia, Leonidas Deligiannidis, Soheyla Amirian, Farid Ghareh Mohammadi, Farzan Shenavarmasouleh, 2026-01-01 This book constitutes the proceedings of the International conference on AI Revolution Research Ethics and Society AIR RES 2025 held in Las Vegas Nevada USA during April 14-16 2025 The AIR RES Conference received 620 submissions of which 131 papers were accepted resulting in a paper acceptance rate of 21%

Business Analytics Walter R. Paczkowski, 2022-01-03 This book focuses on three core knowledge requirements for effective and thorough data analysis for solving business problems These are a foundational understanding of 1 statistical econometric and machine learning techniques 2 data handling capabilities 3 at least one programming language Practical in orientation the volume offers illustrative case studies throughout and examples using Python in the context of Jupyter notebooks Covered topics include demand measurement and forecasting predictive modeling pricing analytics customer satisfaction assessment market and advertising research and new product development and research This volume will be useful to business data analysts data scientists and market research professionals as well as aspiring practitioners in business data analytics It can also be used in colleges and universities offering courses and certifications in business data analytics data science and market research *Business challenge and solve business analyst* Praveshofficial, 2022-09-30

Business challenge and solve business analyst business regarding **Data Science and Business Intelligence for Corporate Decision-Making** Dr. P. S. Aithal, 2024-02-09 About the Book A comprehensive book plan on Data Science and Business Intelligence for Corporate Decision Making with 15 chapters each with several sections Chapter 1 Introduction to Data Science and Business Intelligence Chapter 2 Foundations of Data Science Chapter 3 Business Intelligence Tools and Technologies Chapter 4 Data Visualization for Decision Making Chapter 5 Machine Learning for Business Intelligence Chapter 6 Big Data Analytics Chapter 7 Data Ethics and Governance Chapter 8 Data Driven Decision Making Process Chapter 9 Business Intelligence in Marketing Chapter 10 Financial Analytics and Business Intelligence Chapter 11 Operational Excellence through Data Analytics Chapter 12 Human Resources and People Analytics Chapter 13 Case Studies in Data Driven Decision Making Chapter 14 Future Trends in Data Science and Business Intelligence Chapter 15 Implementing Data Science Strategies in Corporations Each chapter dives deep into the concepts methods and applications of data science and business intelligence providing practical insights real world examples and case studies for corporate decision making processes Towards a Hybrid, Flexible and Socially Engaged Higher Education Michael E. Auer, Uriel R. Cukierman, Eduardo Vendrell Vidal, Edmundo Tovar Caro, 2024-01-25 This book contains papers in the fields of educational virtual environments future of education project based learning PBL and digital education strategy and engineering pedagogy The authors currently witnessing a significant transformation in the development of education on all levels and especially in post secondary education To face these challenges higher education must find innovative and effective ways to respond in a proper way The pandemic period left us with profound changes in the way we teach and learn including the massive use of new means of communication such as videoconferencing and other technological tools Moreover the current explosion of artificial intelligence tools mainly used by students is challenging teaching practices maintained for centuries Scientifically based statements as well as excellent best practice examples are absolutely necessary The 26th International Conference on Interactive Collaborative Learning ICL2023 which took place in Madrid Spain between September 26 and 30 2023 was the perfect place where current trends in higher education were presented and discussed Since its beginning in 1998 this conference has been devoted to new approaches in learning with a focus on collaborative learning in higher education Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and engineering pedagogy In this way the authors try to bridge the gap between pure scientific research and the everyday work of educators Interested readership includes policy makers academics educators researchers in pedagogy and learning theory schoolteachers learning industry further and continuing education lecturers etc Parallel Robots Hamid D. Taghirad, 2025-09-05 In today s rapidly evolving industrial landscape robotics has become essential for meeting the demands of large scale production Parallel robots with their closed loop kinematic structures offer unmatched precision rigidity and load bearing capabilities making them indispensable for tasks

requiring high accuracy and efficiency This book explores the unique advantages of parallel robots providing a comprehensive resource for engineers researchers and students interested in mastering their design analysis and control Building on the success of its first edition this second edition has been extensively restructured and updated to reflect over a decade of progress in robotics It features expanded chapters on dynamics new sections on simulation and calibration and a detailed exploration of control techniques ranging from introductory linear methods to advanced force control With nearly 45% updated references the text ensures readers are equipped with cutting edge knowledge This book is both a comprehensive guide and a gateway to innovation providing detailed insights into the design simulation calibration and control of parallel robots Whether you are a newcomer to robotics or an experienced professional this text equips you with the knowledge to harness the full potential of parallel robots helping you stay ahead in the dynamic field of industrial automation

Discovering Computer Science Jessen Havill,2020-10-27 Havill s problem driven approach introduces algorithmic concepts in context and motivates students with a wide range of interests and backgrounds Janet Davis Associate Professor and Microsoft Chair of Computer Science Whitman College This book looks really great and takes exactly the approach I think should be used for a CS 1 course I think it really fills a need in the textbook landscape Marie desJardins Dean of the College of Organizational Computational and Information Sciences Simmons University Discovering Computer Science is a refreshing departure from introductory programming texts offering students a much more sincere introduction to the breadth and complexity of this ever growing field James Deverick Senior Lecturer The College of William and Mary This unique introduction to the science of computing guides students through broad and universal approaches to problem solving in a variety of contexts and their ultimate implementation as computer programs Daniel Kaplan DeWitt Wallace Professor Macalester College Discovering Computer Science Interdisciplinary Problems Principles and Python Programming is a problem oriented introduction to computational problem solving and programming in Python appropriate for a first course for computer science majors a more targeted disciplinary computing course or at a slower pace any introductory computer science course for a general audience Realizing that an organization around language features only resonates with a narrow audience this textbook instead connects programming to students prior interests using a range of authentic problems from the natural and social sciences and the digital humanities The presentation begins with an introduction to the problem solving process contextualizing programming as an essential component Then as the book progresses each chapter guides students through solutions to increasingly complex problems using a spiral approach to introduce Python language features The text also places programming in the context of fundamental computer science principles such as abstraction efficiency testing and algorithmic techniques offering glimpses of topics that are traditionally put off until later courses This book contains 30 well developed independent projects that

encourage students to explore questions across disciplinary boundaries over 750 homework exercises and 300 integrated reflection questions engage students in problem solving and active reading The accompanying website <https://www.discoveringcs.net> includes more advanced content solutions to selected exercises sample code and data files and pointers for further exploration
