Cultural Influences in Engineering Projects Morgan E. Henrie, 2014-11-24 Culture can be a significant contributor to or hindrance to a team's success. Research has clearly established that failing to have a cohesive team culture creates a severe challenge to any team effort. Culture is also something that everyone brings with them to the team. Yet developing an understanding of what the team culture is, what constitutes a cohesive team culture, and how to modify it such that it enhances the probability of team success is a challenge to team leaders. Cultural team challenges exist within holistic teams from a single nation or multinational teams. *Cultural Influences in Engineering Projects* provides team leaders and interested individuals a cohesive source of information, ideas, and approaches on how to understand, analyze, develop, cultural transition plans, and methods which can improve or modify a team's culture toward success. *Cultural Influences in Engineering Projects* also includes an extensive literature review reference set which provides the reader a ready source where they can continue to expand their cultural knowledge base and ultimately improve their probability of successfully managing holistic and multinational teams. *IEEE International Engineering Management Conference*, 2005

Daim, Melinda Pizarro, Rajasree Talla, 2014-01-04 Across industries, firms vary broadly on how they operate with respect to their Research Development (R D) activities. This volume presents a holistic approach to evaluating the critical elements of R D management, including planning, organization, portfolio management, project management, and knowledge transfer, by assessing R D management from different sectors. Featuring empirical research and in-depth case studies from industries as diverse as medical imaging, electric vehicles, and cyber security, the authors identify common features of successful R D management despite fundamental differences such as company size, number of employees, industry sector, and the R D budget. In particular, they consider the implications for decision making with respect to resource allocation and investments such as site selection, purchasing, and cross-departmental communication.
