Solidification Processing Merton C. Flemings,1974 **Proceedings of the Merton C. Flemings Symposium on Solidification and Materials Processing** Merton C. Flemings,2001 This text comprises a collection of papers from the Merton C Flemings Symposium held on the MIT campus in June 2000 The papers cover such topics as dendritic solidification dynamics control of casting quality interdendritic fluid flow semi solid processing and engineering education Rapid Solidification Processing Loren A. Jacobson,1994 Eutectic Solidification Processing Roy Elliott,2013-10-22 Eutectic Solidification Processing Crystalline and Glassy Alloys deals with solidification theory and its application to eutectic processing of crystalline and glassy alloys The underlying theme is an analysis of the different paths taken by the liquid solid transformation as the cooling rate increases and a description of the structure and properties of the solid formed ranging from equilibrium to metastable phase formation in castings to metallic glass formation in splat quenched ribbons This text has seven chapters the first of which describes the main characteristics of the liquid solid transformation The chapters that follow show how control over composition trace impurities heat flow and cooling rate and nucleation and growth gives rise to a wide range of solidification structures Models of the nucleation and growth of eutectic and primary phases are analyzed and used to explain how cast microstructures are formed Aluminum casting alloys and all types of cast iron are discussed along with primary phase formation the dependence of the extent of segregation on solidification conditions and the practice of segregation prevention during solidification This book also describes the importance of fluid flow in producing macroscopic segregation in large ingots and considers ways of minimizing this defect Finally this book gives a brief account of the various types of metallic glasses their fabrication important properties and potential applications This book will be of interest to materials scientists and industrial materials engineers Rapidly Solidification Processing National Research Council (U.S.). National Materials Advisory Board. Commission on Engineering and Technical Systems,1982 *Rapid Solidification Processing* Robert Mehrabian,Phillip A. Parrish,1988 *Solidification Processing of Reinforced Metals* R. Asthana,1998-04-06 Much of the success of composites can be attributed to the development of innovative processes Many useful composites are envisaged by materials scientists but the problem of how to make them is often the greater hurdle This process oriented book focuses on the basic principles of composite fabrication Upon studying these processes one is immediately struck by the diversity of ideas and techniques In some cases these have been borrowed from other technologies and were designed for use with quite different materials In other cases some very clever new means have been developed which take account of the characteristics of metals and ceramics and the higher temperatures which are typically involved in their processing *Seminar on Solidification Processing* Japan Society for Promotion of Science,National Science Foundation, USA.,1983 Rapid Solidification Processing ,1978 **Solidification Processing** ,1981 **Solidification Processing under Microgravity** Peter R.
