

Questions About the Missing Person Lab

Base your answers to the following questions on what you have learned. Glue the questions into your ISN as a stamp grade.

1. What did you observe about the outfits within the same column (family or group)? Why do you think they are wearing similar clothes?

They wear clothes with similar colors to symbolize that they are a group/family. The only difference is that the older ones they have, the bigger they are. They have similar properties.

2. What can the increase in the size of the "cousins" be compared to on the periodic table?

The bigger the cousins, the larger the mass.

3. How does the number of arms each cousin has relate to the number of energy levels that exist for specific atoms?

The number of arms represents the number of energy levels on an atom because both wear heads and energy levels are circles.

4. What is the significance of the number of fingers on each of the hands?

The number of fingers symbolize the amount of electrons it possess.

5. Compare the number of hairs on the heads of the cousins to valence electrons. How does this observation relate to Mendeleev's work?

The number of hairs on their heads represent the number of valence electrons. Mendeleev organized the periodic table by valence electrons.

6. Why are some cousins smiling while others are frowning? (Hint: Some atoms need only to gain or lose one, two, or three electrons to have a full outer energy shell.)

The smiling cousins are the ones with full energy shells. The ones who are not don't.
