GEOGRAPHY APPLICATIONS: REGION

Decade of the Democrats

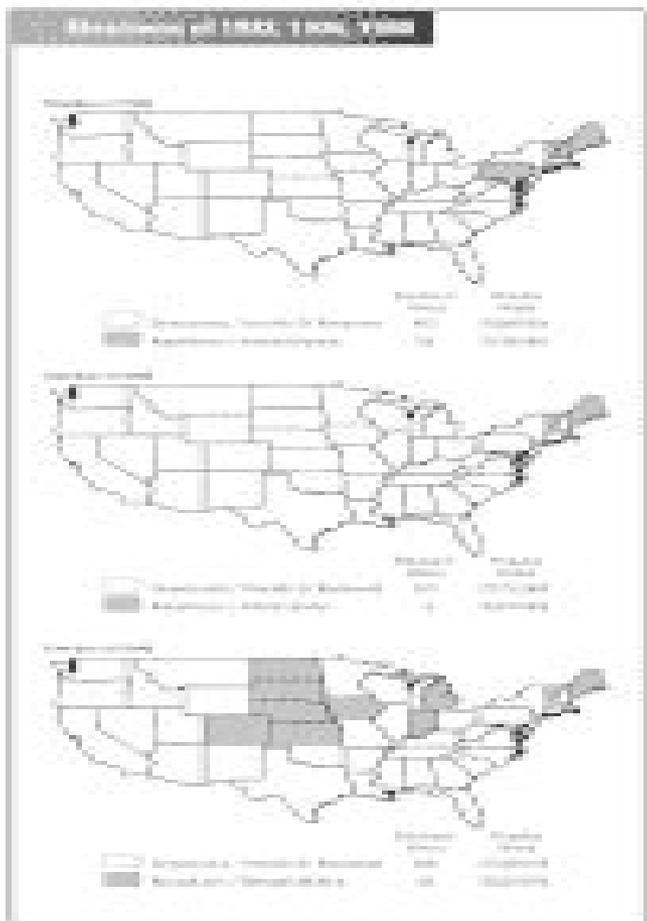

Directions: Read the paragraphs below and study the maps carefully. Then answer the questions that follow.

The Democratic Party controlled the federal government for most of the 1890s. The Republicans' usually voluntary programs to remedy the ravages of the Great Depression had failed, so in 1932 Democrat Franklin D. Roosevelt was elected president. Only the Northeast, a Republican stronghold, did not embrace Roosevelt. Elsewhere, his support was overwhelming.

The Democrats had put together a new coalition of voters: white southerners, blue-collar workers of the industrialized North, African Americans, farmers of the Midwest and Great Plains, and voters in the "Red South" aimed to give the Democratic Party a national majority for the first time since the Civil War.

These people had voted for change, and they got what they wanted. To put the nation on the road to economic recovery, Roosevelt pushed through a collection of such programs often called "alphabet soup" for initials such as WPA and CCC. The early 1930s marked the high point of those New Deal programs. Millions of people were put back to work, and many economic recovery projects were in full swing.

By the end of the 1930s, however, the situation had changed. The country slowly recovering out of the depths of the Great Depression had suffered another period of economic decline in 1937–1938, and unemployment was once again a major problem. Business leaders and Congress had become more vocal in their criticism of the New Deal, and many of its programs were scaled. In the 1940 presidential election, eight states—all in the agricultural Midwest and Great Plains—had switched their support from Roosevelt to the Republican candidate, Wendell Willkie. Though Roosevelt's popularity remained strong elsewhere, particularly in the Democratic stronghold of the South, it would take the U.S. involvement in World War II to put the nation's economy into the full recovery that Roosevelt had been seeking.
