Combinatorics and Commutative Algebra Richard Stanley, 1996-03-01 Stanley represents a broad perspective with respect to two significant topics from Combinatorial Commutative Algebra 1 The theory of invariants of a torus acting linearly on a polynomial ring and 2 The face ring of a simplicial complex In this new edition the author further develops some interesting properties of face rings with application to combinatorics

**Combinatorics and Commutative Algebra** Richard P. Stanley, 2007-12-13 Some remarkable connections between commutative algebra and combinatorics have been discovered in recent years This book provides an overview of two of the main topics in this area The first concerns the solutions of linear equations in nonnegative integers Applications are given to the enumeration of integer stochastic matrices or magic squares the volume of polytopes combinatorial reciprocity theorems and related results The second topic deals with the face ring of a simplicial complex and includes a proof of the Upper Bound Conjecture for Spheres An introductory chapter giving background information in algebra combinatorics and topology broadens access to this material for non specialists New to this edition is a chapter surveying more recent work related to face rings focusing on applications to f vectors
