are available from the author While the common multiple regression method has a wide range of applicability and can be  
accommodated to various different kinds of regressor variables its application is limited to the modelling of response  
variables from the space of real numbers For the analysis of other kinds of responses such as counts a more generalised set  
of tools is needed This toolset is given by the generalised linear model framework and maximum likelihood estimation For the  
specific purpose of this paper the count data analysis methods of Poisson Negative Binomial Hurdle and Zero Inflation  
models are considered This paper explains their theoretical background and applies them to a unique dataset that motivates  
their respective use It is structured as follows section 2 describes the applied dataset and section 3 the generalised linear  
model framework In section 4 and section 5 the basic count data models and their results are discussed while section 6 and  
section 7 explain the more advanced methods and their results section 8 concludes Developing Kindergartners'
