**Contrastive Analysis vs. Error Analysis in Respect of their Treatment of the Avoidance Phenomenon** Elena Gluth, 2020-04-06 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 1 5 Free University of Berlin Institut für Englische Philologie language English abstract This research paper compares contrastive analysis with the error analysis approach in respect of their treatment of avoidance behaviour It considers several researches on avoidance behaviour and shows that contrastive analysis predicts the avoidance phenomenon in most cases and therefore gives a complete description of the areas of difficulty for learners of a second language There exist two different approaches for the identification of possible learning problems in the second language acquisition contrastive analysis and error analysis A number of proponents of an error analysis approach claim that contrastive analysis cannot serve as an adequate tool for identifying the areas of difficulty for learners of a second language But on the other hand it has been noticed that error analysis is not able to explain the avoidance phenomenon since error analysis registers only the errors done by learners of a second language Avoidance behaviour represents a communicative strategy of a learner of a second language by which the learner prefers using a simpler form instead of the target linguistic element for the reason of difficulty on the part of the target feature Consequently avoidance behaviour serves as a manifestation of learning problems and its results should be definitely considered when compiling language syllabi and tests

implications are drawn from the study of the frequency of errors for fifteen types of errors chosen as representatives of important classes of grammar or as general trouble makers Rank ordered lists are provided as well as tables and graphs illustrating the relative frequency of the errors Some of the conclusions are that negative transfer is an important source of errors and that with regard to intralingual errors overgeneralization seems to be the most common cause To reduce errors of all types and promote communication and fluency an eclectic method is suggested It is also noted that some errors persist on all levels even after many years of study AMH
