## Comet Carl Sagan:

**Comet** Carl Sagan, Ann Druyan, 2011-07-06 What are these graceful visitors to our skies We now know that they bring both life and death and teach us about our origins Comet begins with a breathtaking journey through space astride a comet Pulitzer Prize winning astronomer Carl Sagan author of *Cosmos* and *Contact* and writer Ann Druyan explore the origin nature and future of comets and the exotic myths and portents attached to them The authors show how comets have spurred some of the great discoveries in the history of science and raise intriguing questions about these brilliant visitors from the interstellar dark Were the fates of the dinosaurs and the origins of humans tied to the wanderings of a comet Are comets the building blocks from which worlds are formed Lavishly illustrated with photographs and specially commissioned full color paintings *Comet* is an enthralling adventure indispensable for anyone who has ever gazed up at the heavens and wondered why Praise for *Comet* Simply the best The Times of London Fascinating evocative inspiring The Washington Post *Comet* humanizes science A beautiful interesting book United Press International Masterful science poetry and imagination The Atlanta Journal Constitution *Comet* Carl Sagan, Ann Druyan, 1990-05-01 *The Comet Box* Adrian Stirling, 2011-05-25 It's 1986 and Halley's Comet is hurtling towards Earth Everyone is talking about what the comet will bring wishes could be granted people might go mad great disasters could happen When Andrew is asked to write down his greatest wish for the *Comet Box* he can think of only one thing that his runaway sister Amelia will finally come home As the comet draws nearer he begins to learn the reasons why she left in the first place and the more he learns the more he wants to forget When Amelia is captured and brought home she reveals a shocking secret that makes Andrew's once safe world begin to unravel As the comet arrives Andrew must choose whether to be blind to the mistakes of the people around him or to side with his sister as she tears his family apart **Martian Metamorphoses** Ev Cochrane, 1997 **Soviet Life**, 1986 **When the Asteroid Hits** Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded [Astronomers and Cosmologists](#) Dean Miller, 2014-01-01 In this book a breakdown of the life and work of some of history's pioneers in the study of astronomy and cosmology are thoroughly explored This volume provides excellent biographical sketches for trailblazers in the sciences Articles are devoted

to specific scientists covering the contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience This historical review includes scientists from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century
